Insight is the top selling asset management solution for Jira

Atlassian users trust Insight to maintain their assets—whatever they might be—and with good reason. No matter what industry you're in, let Insight help you enhance productivity, reduce costs, and grow your organization.

"Besides being the only asset management app [for Jira] that can support ITIL, the support is outstanding"

- Daphne Thunnissen,
Atlassian Consultant at Prepend

insight

Unleash the power of assets

Insight gives you access to information about your assets and how they affect your everyday operations. Whatever business you're in, **understanding the role of assets and how they affect each other** is crucial to the success of any business. With Insight, you will:

- Manage and control all your assets
- Make smarter, more informed business decisions
- Boost productivity and operational efficiency

Make your work life easier

Insight can manage any asset, automate and enhance any business process, and improve any service.

Insight customers manage millions of assets. From large enterprise organizations to small businesses, Insight is used by professionals in:

- IT Service Management (ITSM)
- Human Resources (HR)
- Facility Management
- Legal & Compliance
- CMDB, Service & Product Catalogs
- And a **lot** more!

Make Insight your superpower

Insight takes the guesswork out of asset management and allows you to **get the most out of your Jira projects** - all by adding context to every operation.

Track your assets throughout their lifecycle using powerful search, reporting, mapping and automation features and elevate the organization's service experience. With unparalleled feature flexibility, **Insight is a robust asset management tool** that will always scale with your business.

insight discovery   **insight** integrations

Take control of your IT landscape

Discover and track all your IT assets to reduce infrastructure costs and risk, while also increasing productivity.

With agentless and effortless network scanning, you can easily build and maintain an exhaustive, trustworthy **inventory** of your IT infrastructure.

Elevate business value with asset consolidation

Use free integrations with your favorite providers and apps to get all your data into a **single-source-of-truth.**

Eliminate data silos, import all relevant business data from multiple data sources and put an end to the usage of archaic systems like spreadsheets.
