

# Zephyr for Jira

Enhance Jira with a full-featured Agile test management solution

## Accelerate Speed to Market With the World's Most Widely Used Test Management Solution

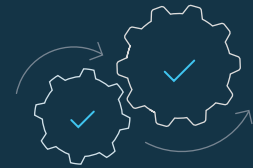

### Full Testing and Reporting Capabilities- Right Inside Jira

Get full featured test management inside Jira. Make informed software release decisions with end-to-end traceability and test metric gadgets that can be added to any Jira dashboard.

### Test Faster and Collaborate Better With an Agile-Ready Solution

Create and execute on your test plans faster, with features such as folder structures, custom fields, and an integrated data importer tool. Experience full testing benefits with an intuitive UI and an interactive in-app walkthrough.

### Seamless Integrations With Automation and CI Tools

Advance your test automation efforts by easily integrating with your favorite automation tools, such as Selenium, and continuous integration tools, such as Bamboo or Jenkins.

*So far we have been able to accomplish everything we need by using Zephyr for Jira. The price was reasonable, the tool is powerful, and the documentation is very helpful. We would recommend this to anyone looking to perform tests within Jira.*

– Jim Beckner III, Telecommunications

*The best thing is that it smoothly integrates into Jira, that you don't even notice that you're working in another tool.*

– Taras Mysko, Technology

# Zephyr Enterprise

Elevate your enterprise with a scalable test management solution

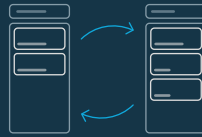

## A Robust Test Management Solution With Real-Time Jira Integration

### Independent Solution That Is Stacked for Scale

Get enhanced control on every stage of your software release with a standalone solution (managed outside of the Atlassian ecosystem) that is stacked for scale, enabling horizontal scalability to support up to 10,000 concurrent logins.

### Enhance Cross Project Management With Multi-Project, Multi-Jira

Connect and consolidate your data, and manage defects across multiple Jira systems, with just one Zephyr deployment. Keep project teams in sync on cross-project quality initiatives.

### Empower Teams With End-to-end Visibility and Global Repositories

Get deeper visibility on your testing progress with interactive reports and customizable dashboards. Enable your teams to kick-off projects faster with a global test case repository shared across projects and releases.

*We picked what we thought was the most mature product of all those we had evaluated. Zephyr offered the most features and functionality that were needed for our project team. It is very easy to use and straightforward.*

– Jan Vriens, QA Manager, Acerta

*Outside of the testers, it's also easier for other parties, like management or other stakeholders who need to look at the testing process. That's been very useful to our team.*

– Idibek Biharmonic, Senior QA Analyst with Scivantage
