# What's new in Gliffy?

"LIKE" YOUR DIAGRAMS

This handy new like button is a great way to fast-track approvals, confirm that your team has seen an update, or simply give props.

AWS SHAPES

That's right: updated AWS shapes for all your diagramming needs. Plus, improved functionality of all shapes in the editor.

NEW LAYER FUNCTIONS

Link layers or enable layer switching to give viewers of your diagram as much info — or as little — as they need.

RENAME DIAGRAMS

This update makes Gliffy as intuitive as ever. Simply click the name of your diagram for the opportunity to rename it.

DRAW.IO IMPORT

You asked, we listened. Gliffy now has the ability to import files from draw.io, as well as improvements to other import formats.

SHAREABLE TEMPLATES

Fast-track your team by building out templates for the diagrams you'll use again and again. Time = saved.
