

Cost Tracker for Tempo Timesheets

Gain visibility into your project costs and overall project health with Tempo

Tempo Cost Tracker is an app that transforms your teams' tracked time efforts in Tempo Timesheets into tracked cost, creating a simple to use financial picture of each project with complete visualizations organized by individuals and by teams.

With Tempo Cost Tracker, you see the value of projects and that your team's efforts are carried out efficiently with regards to cost in addition to time. Cost Tracker is a financial project management app for Tempo Timesheets only.

- Easy and simple to set up
- Visualize critical KPIs; budget, actual costs & time spent on projects
- Share your projects across the organization
- Get a high level view of all your projects and their status
- Add a fixed budget, set hourly rates and track expenses

Cost Tracker is a great addition to the Tempo cloud product suite, it has fast become one of our most used Jira add-ons. Easy to configure and easy to use, a winner all round.

Alex Adland, Business Systems Manager of OLM systems Limited

We have some unique challenges that have made budgeting a challenge in the past. As an agency with long-term contracts that are customized each month, we needed a tool that was both flexible and simple, while working seamlessly with Jira data. Cost Tracker fits the bill perfectly, giving us the flexibility, control, insights, and quick access to budget data we needed.

Nate Dame, CEO of Profound Strategy
