Tempo

No more operating in the dark

How to provide full visibility into your company and product strategies

Shannon Mason, CPO at Tempo

Today's topics

- How is Tempo bringing together strategic roadmapping, team time & capacity management and project and program management
- What are the biggest portfolio management challenges?
- How to communicate priorities and progress
- Allocate team time and see annual plans in a unified way
- Break down functional silos and build integrated roadmaps
- Give budget insights

How is the landscape changing

Shifting to product-centric delivery

Modernization of Portfolio Management & Program & Project Management Offices

Lean-Agile mentalities from teams to senior leaders

A real world example

Video streaming

What is SPM?

How an organization chooses to focus its priorities, people and spend across their portfolio of products and services.

**...the modernization of PPM**

Strategic Portfolio Management

Strategic Roadmap

Product Management

Global Capacity & Funding

Program & Project Management

Team Time & Capacity

A real world example

Financial services

What Makes it Modern?

Customer, Product, & Roadmap Focused

The nexus of customer and user experience, the business, and technology that defines the next step and beyond.

Feedback & Ideation

Striking a balance between what our customers want and what they don't know they need yet.
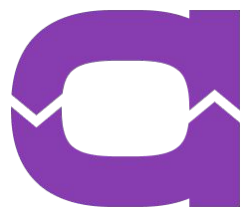

Where to Invest

Connecting and managing investment based on high impact initiatives and new innovation in a product and services-centric way.
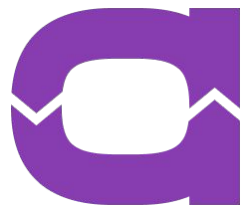

Understanding Capacity

Creating the space for teams to realistically execute and understand critical constraints.

Transitioning Strategy to Tactics

Elaborating and coordinating these strategic initiatives that serve common organizational objectives or strategies.

Adaptability in Real-Time

Adjustment is based on impact and outcome gained through visibility.

A real world example

Automotive

Tempo makes it modern

Tempo vision and acquisitions

Tempo + **ALM Works** + **Roadmunk**

Combining the popular structural artifact aggregation with top human capacity planning

Combined solution provides automatic and holistic visibility into the progression of complex programs for real time tracking and visualization.

Blended with budget information to ensure Program Managers and PMO Directors can provide updated spend information based on allocation.
