# Checkout
Procurement & Asset Manager

Streamline your purchase requests, procurement, and asset management with the simplicity and power of Jira Service Management

Simplify asset requests

Checkout ends the confusion of making requests by email or phone. Instead, teams place all of their requests in Jira Service Management, by browsing the beautiful catalog, adding items to their cart, and checking out!

Fulfill requests with inventory or a vendor order

All of the information your team needs—available assets, budgets, and vendor details—is available in Checkout. Fulfill the request with assets in inventory or instantly create a purchase order to your vendors.

Manage assets across the company

Use built-in asset management to track assets, monitor inventory, and manage spending against procurement budgets, keeping all stakeholders informed.
