Chat with your team

Get the conversation started without leaving Jira: Launch multiple Microsoft Teams chats or channel conversations right in your Jira issue. All replies instantly appear in both Teams and Jira.

Give non-Jira users access to issue details and chat functionalities by adding your Jira board as a Microsoft Teams tab.

Work with emails

Read, send, and schedule emails connected to your Outlook account. Email templates make project communication even easier.

Keep your team in the loop: future email replies are automatically shown in Jira, too.

Add personal tasks

Open Microsoft To Do right in the issue to add personal tasks easily. All tasks will be pushed to your chosen To Do list instantly.

Accelerate with automation

With automation rules, repetitive processes can be replaced scalably with little effort.

For example: When the issue status changes to "In Progress", a Microsoft Teams chat is created automatically between the assignee and reporter.

Benefits

Speed up your processes with Microsoft 365 for Jira. Connect Microsoft Outlook and Teams with Jira and smoothly work with the tools you need. Fully integrated, quick, transparent.

Pro tip: press M to comment

Make your processes seamless with one full-scale integration to connect your daily tools.

Quick

Improve communication with the whole team through cross-tool conversations in real time.

Schedule meetings

See if your customer or colleague is available for a meeting right away. Send Outlook calendar invites directly from Jira, including a unique Microsoft Teams link. Chats from Microsoft Teams meetings are shown in the Jira issue.

Clear documentation

Link discussions clearly in the issue to find them later and understand decisions retrospectively.
