April 18-20, 2023

Lukas Gotter
Founder & CEO, Meetical Software Ltd.

ABOUT ME

August 2020: Meetical wins the Atlassian CodeGeist Grand Prize 🏆

September 2020: Atlassian Ventures invests in Meetical

April 2021: Meetical launched the data center version, free version, and cloud-fortified security app

July 2022: Meetical manages 2,500+ meetings per week for their growing cloud customer base

November 2022: Meetical wins Codegeist again: 4th in business apps

January 2023: Meetical launches 🚀 two new apps to the marketplace: task reports and easy calendar integration

Why we need seamless integrations for cross-team collaboration

Integration assessment framework: need, impact, technical robustness

7 integrations to improve cross-team collaboration in the Atlassian ecosystem

Why is cross-team collaboration important?

“

**Companies that foster
collaboration are five
times as likely to be high-
performing.**

— McKinsey Global Institute, “The social economy: Unlocking value and productivity through social technologies”

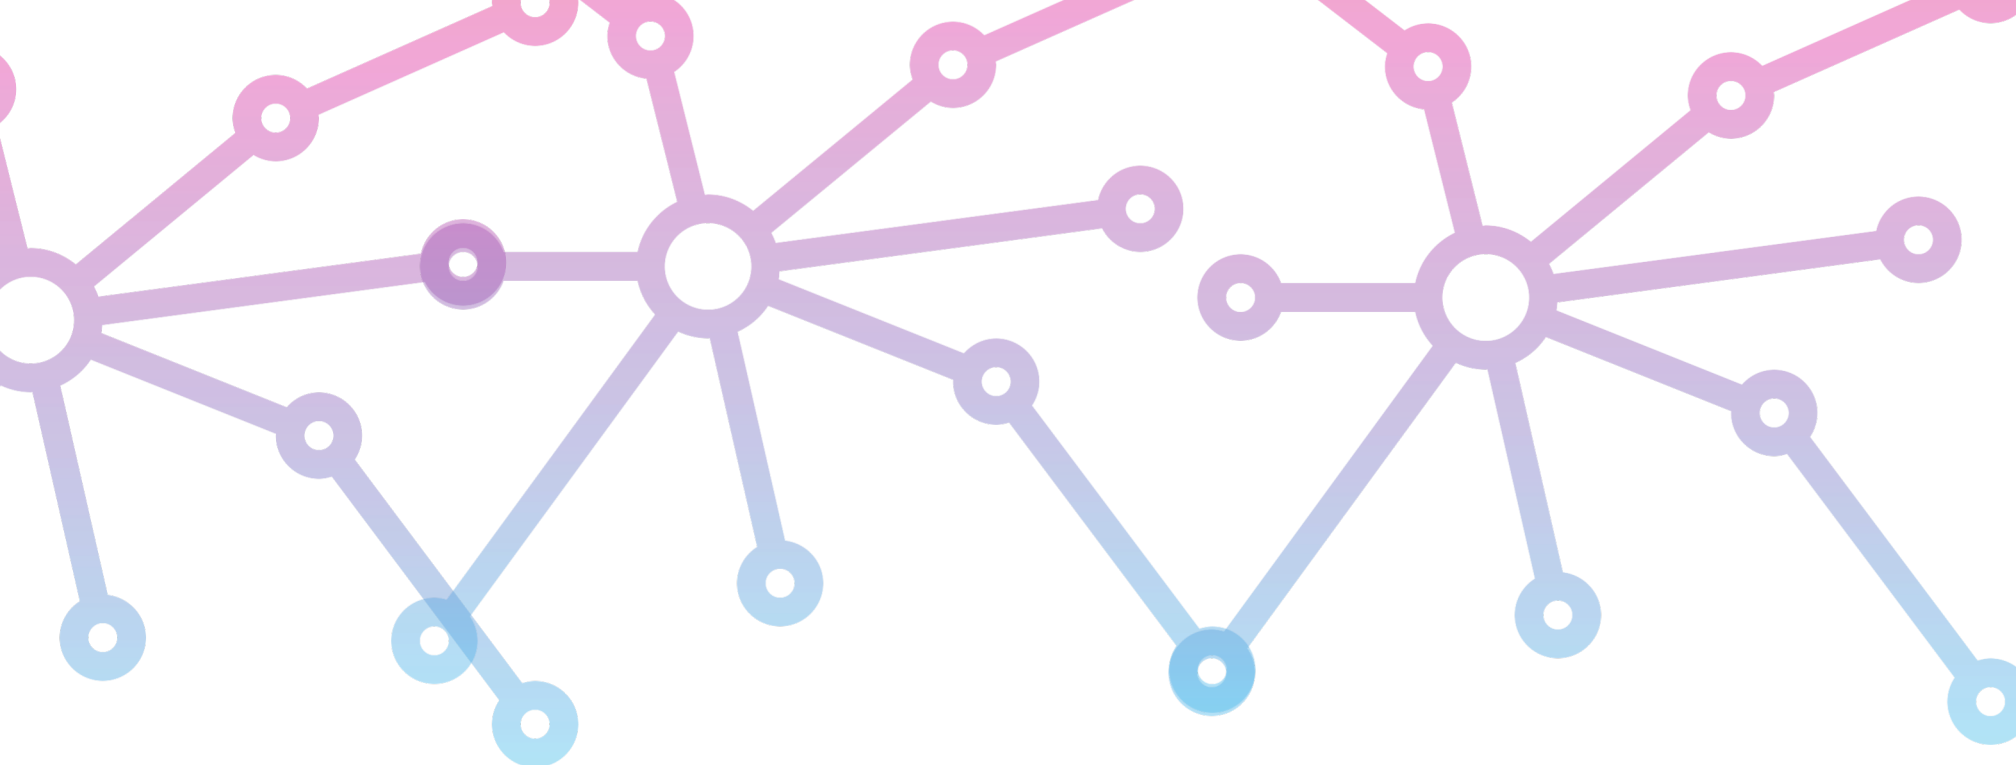

**Why do we need
seamless
integrations?**

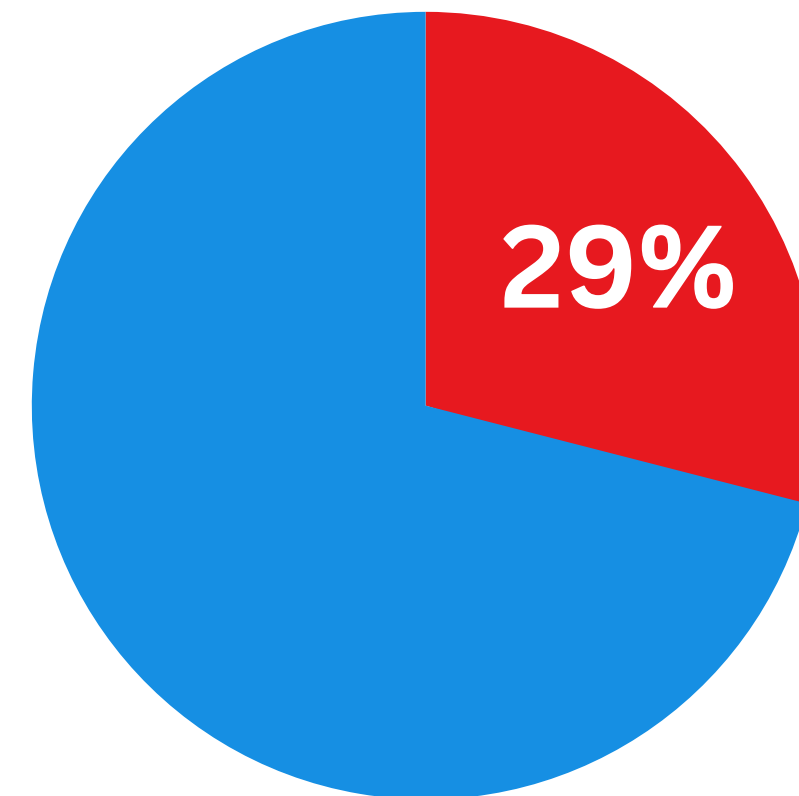

70% of employees say that seamless integration of applications would make it easier to complete their work, while **66%** of employees say that switching between applications slows them down.

Source: BetterCloud

1,061

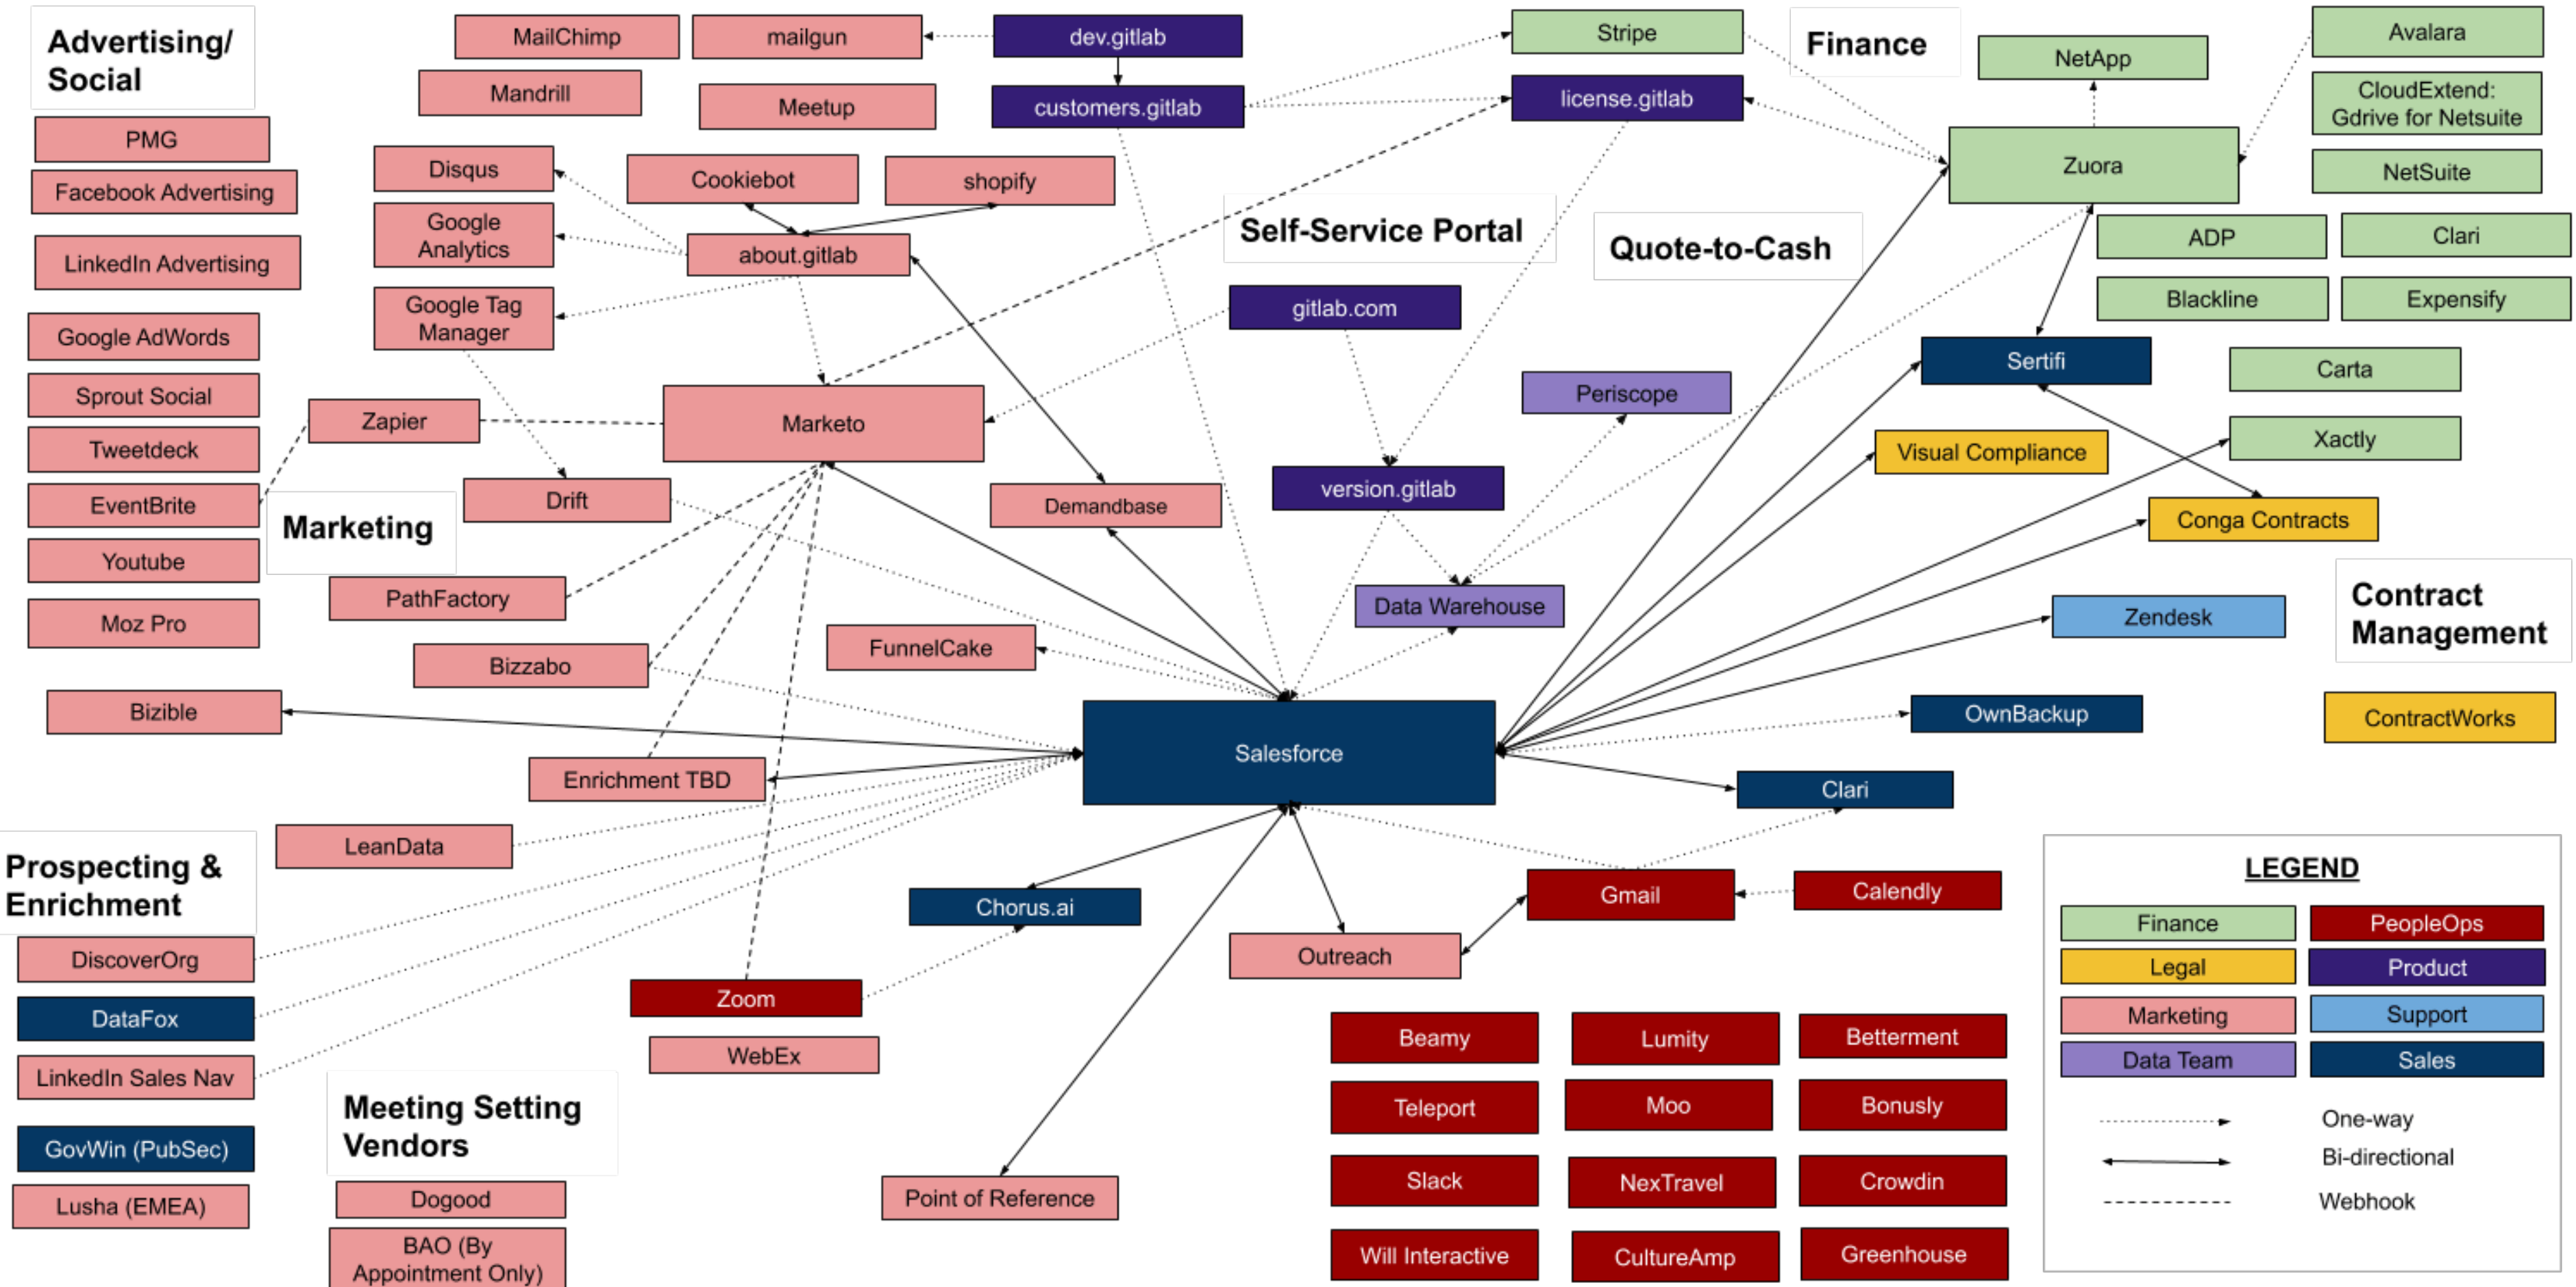

**The average number of
applications used in each
organization**

**The average percentage
of apps that
connect/integrate**

Source: MuleSoft/Salesforce, “2023 Connectivity Benchmark Report”

Gitlab Data Infrastructure

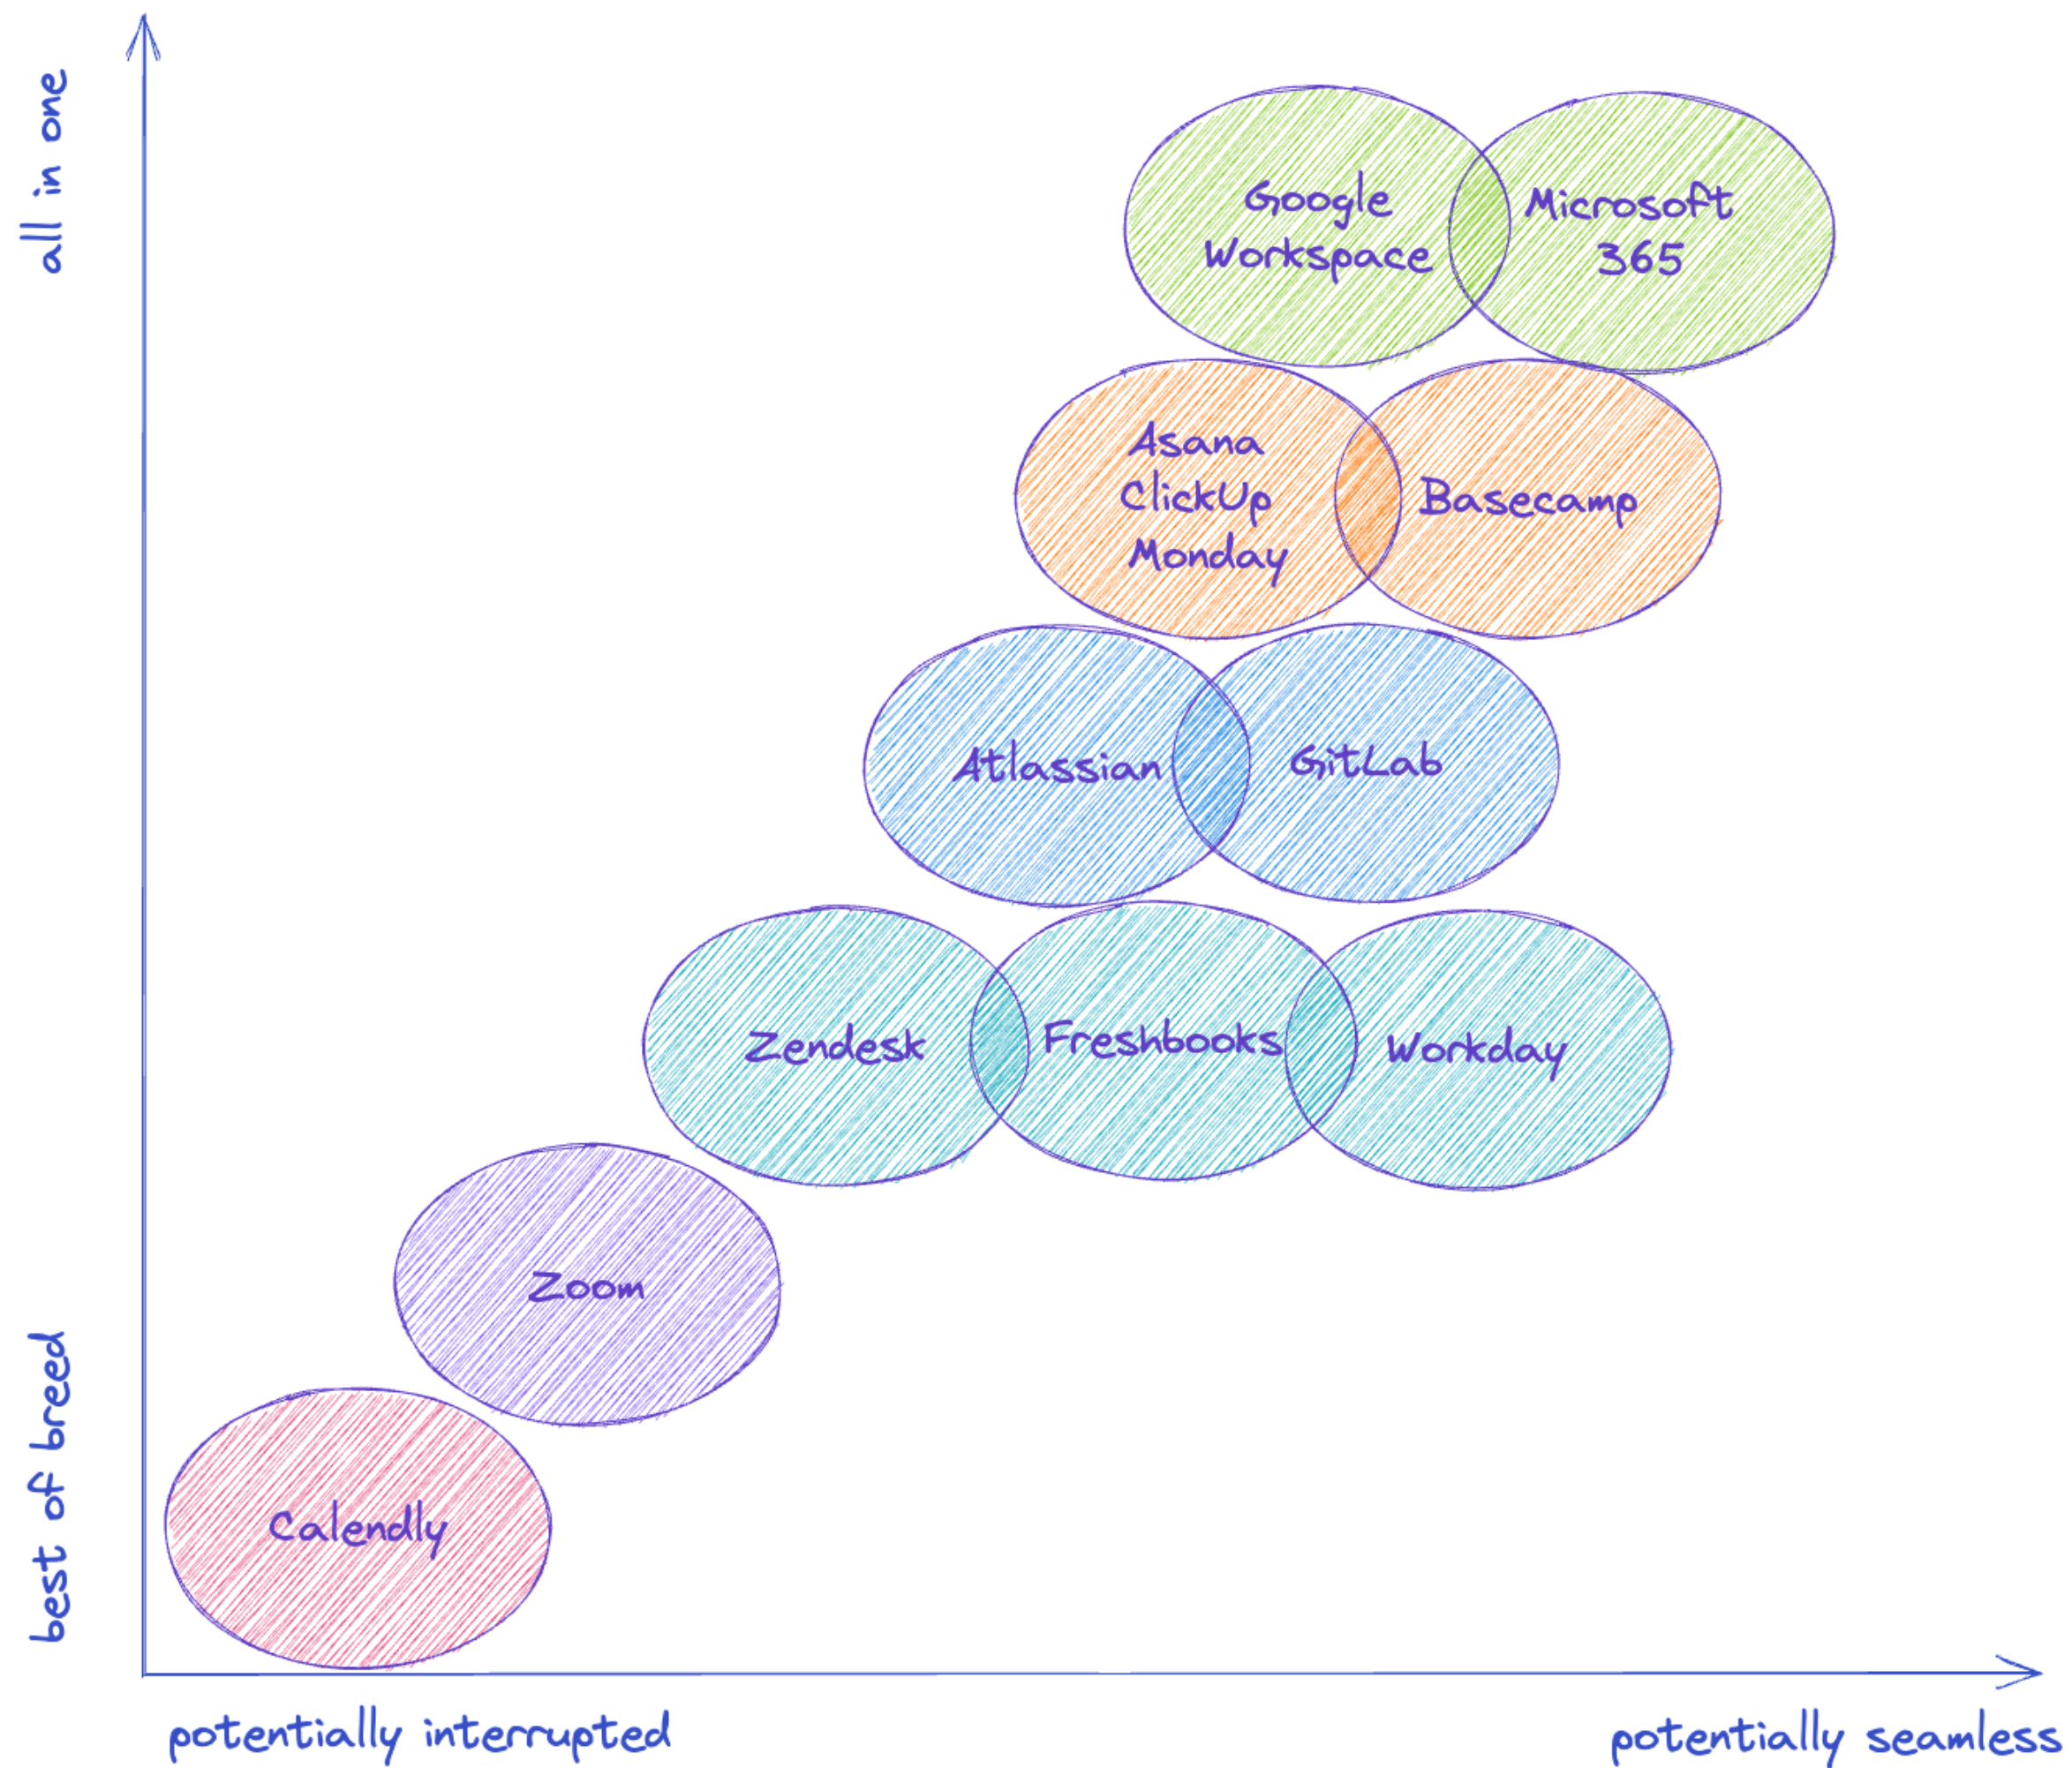

Too many integrations overflow exception

Best-of-breed

VS.

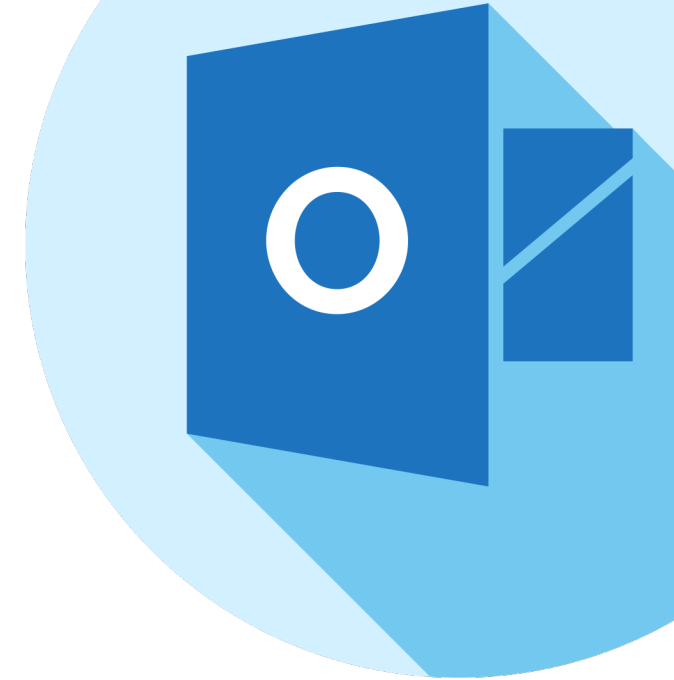

all-in-one

Both all-in-one and best-of-breed solutions are *not guaranteed* to be seamless.

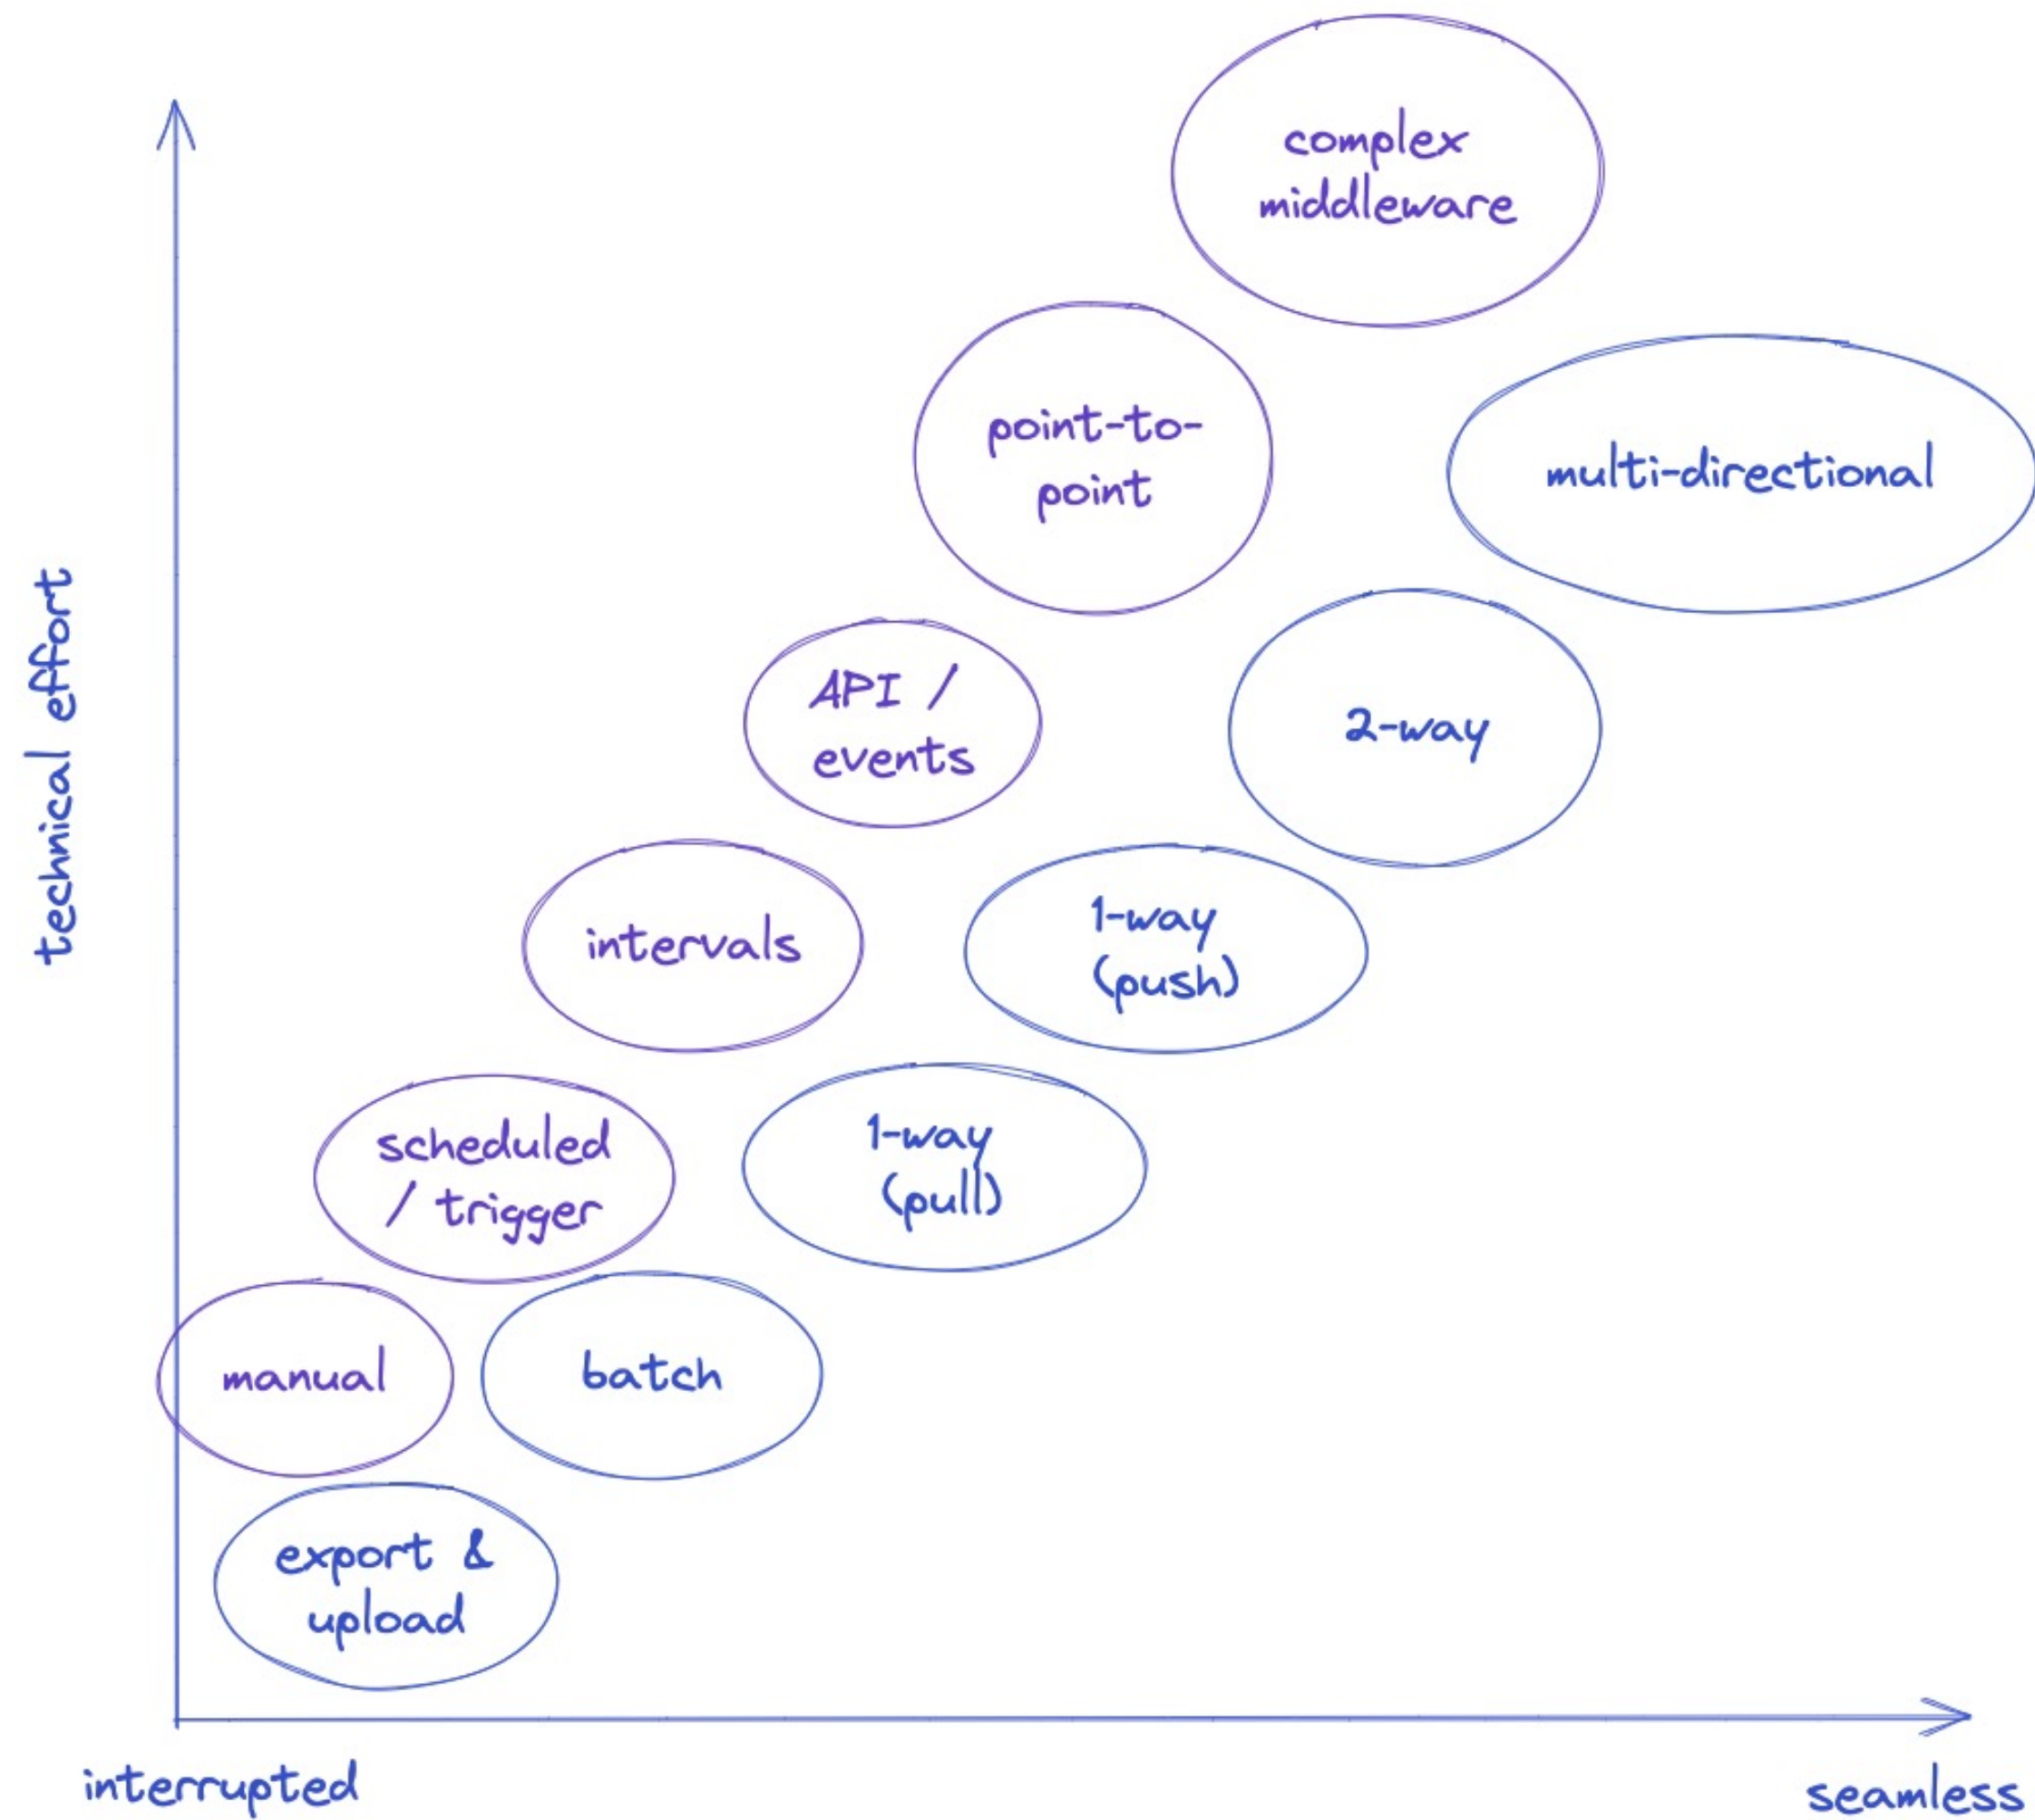

Examples of limitations:

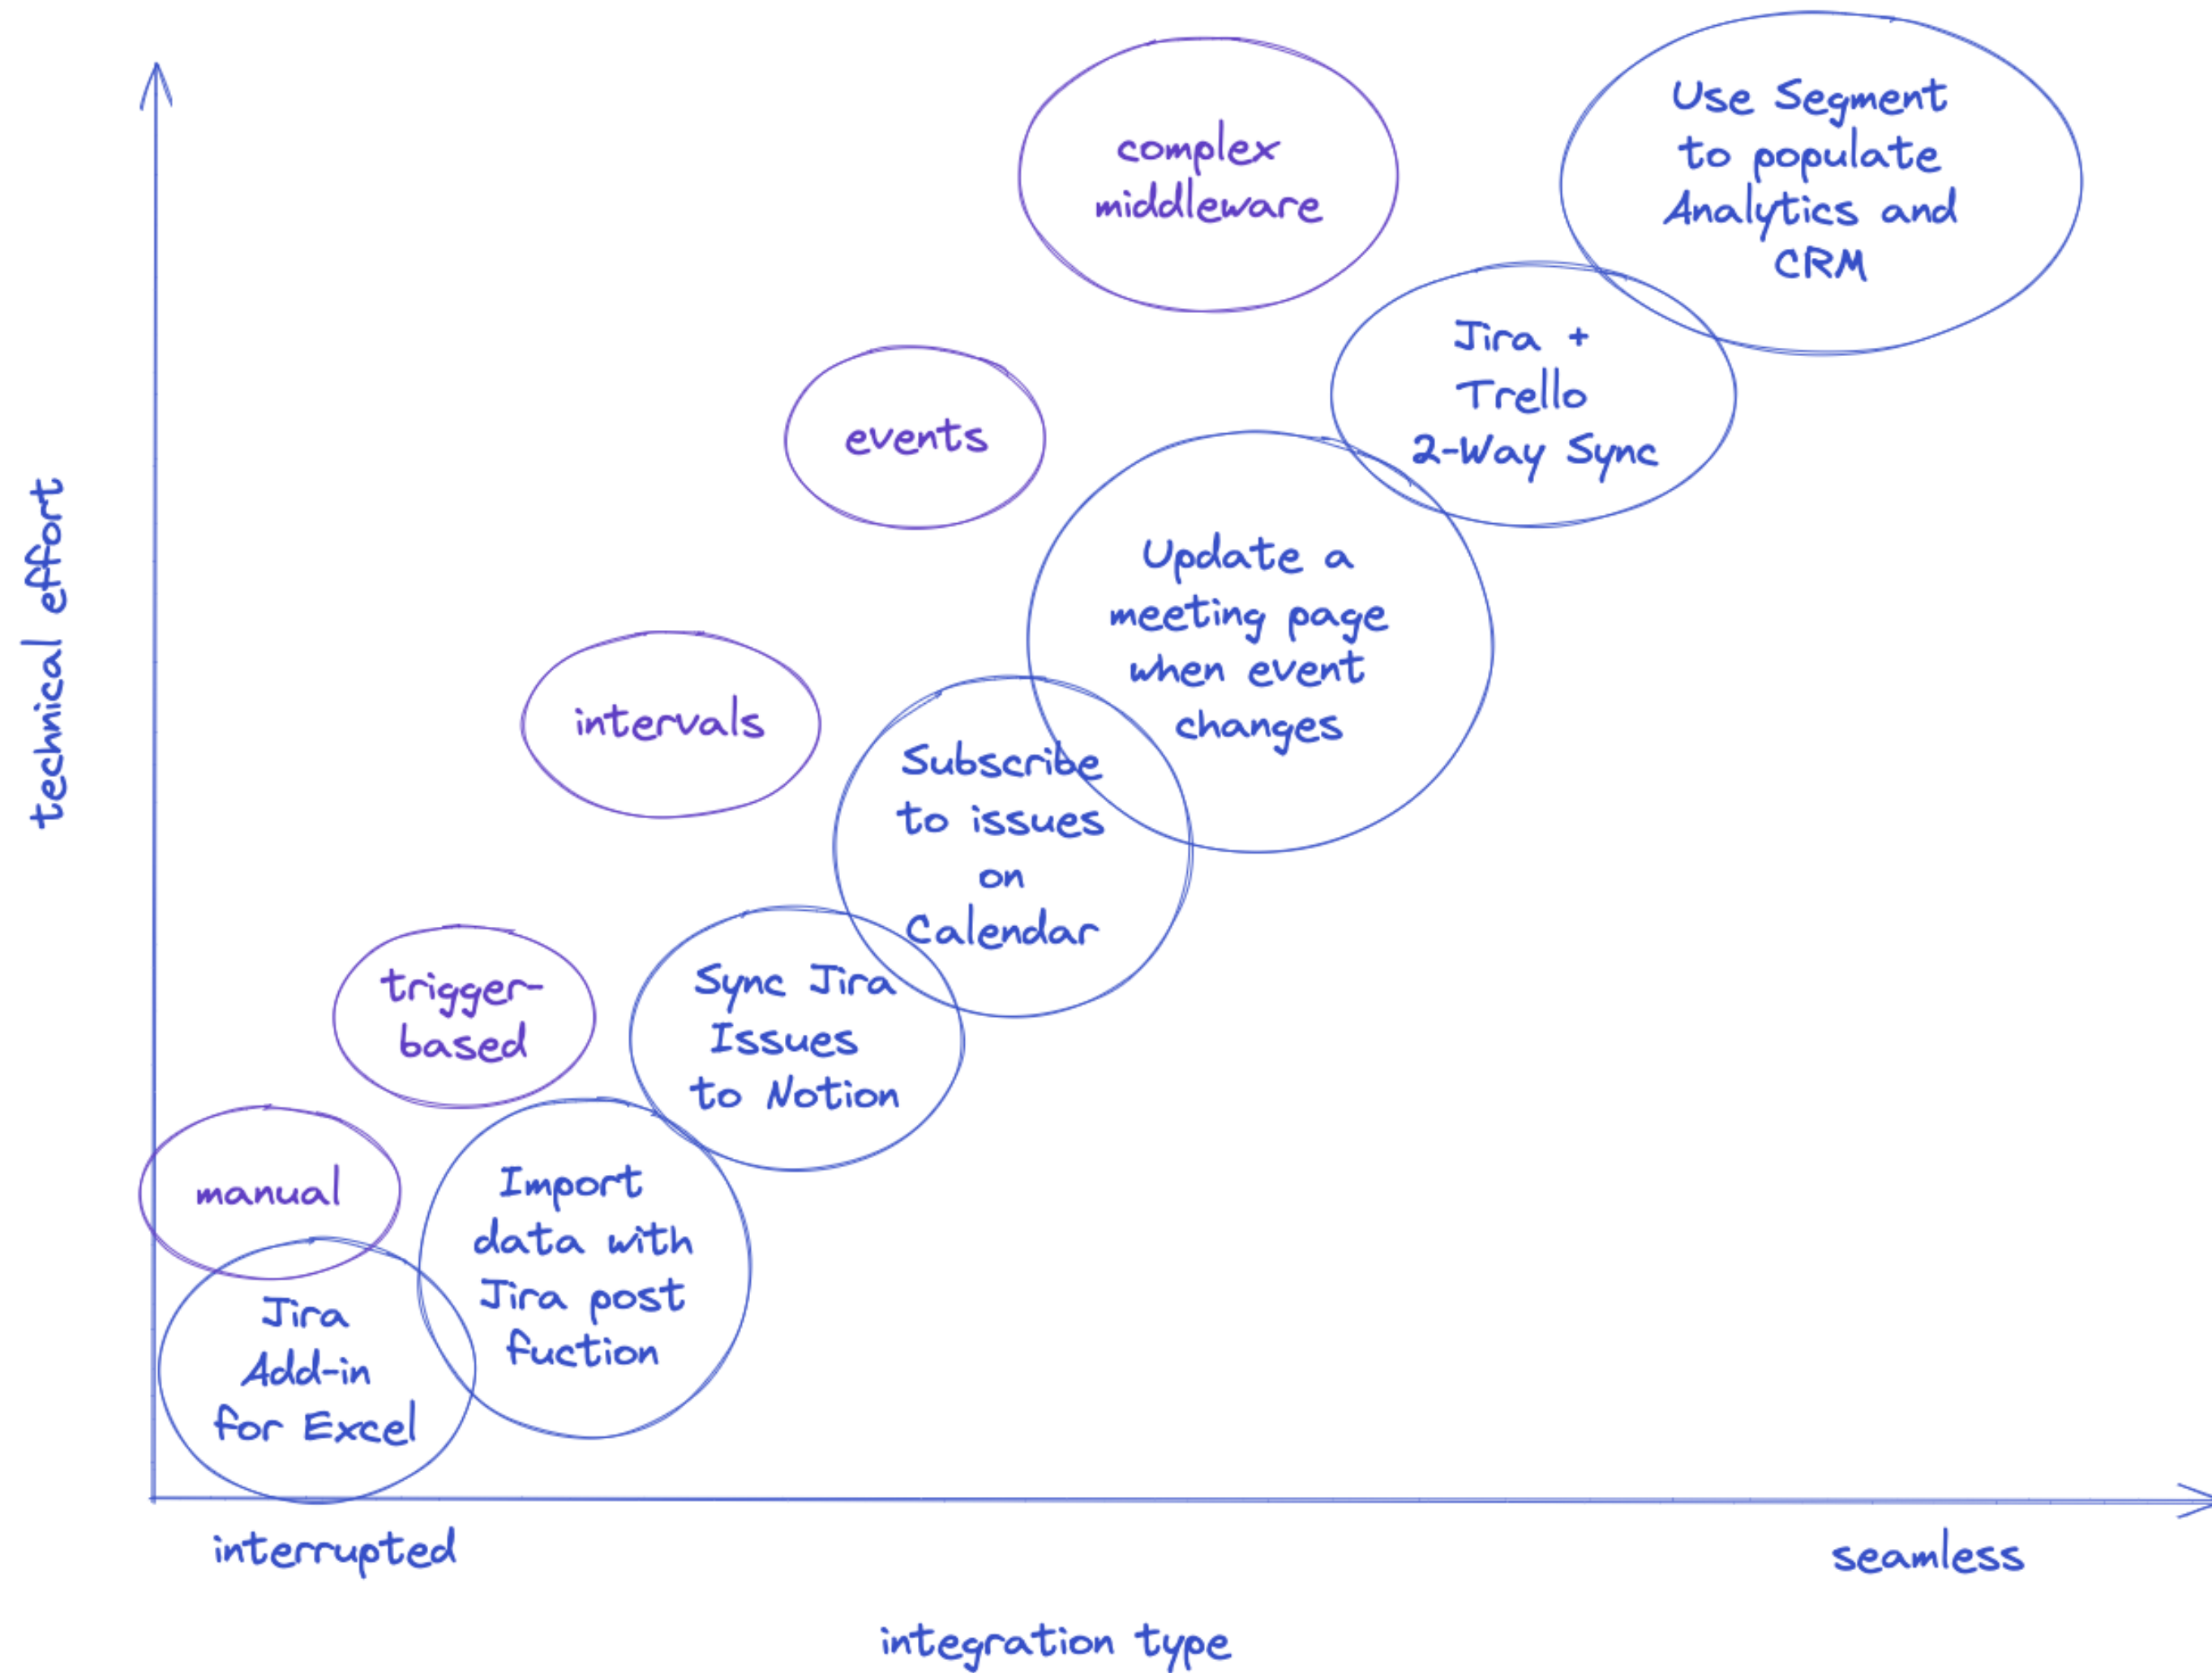

- Microsoft Outlook can only trigger a basic copy/paste into OneNote.
- OneNote task/to-do items are not synced to Outlook/Microsoft To Do.
- Atlassian Confluence Tasks cannot be shown on Jira dashboards.
- Send Zoom call chat to Microsoft Teams channel.
- Connect Calendly to create a Confluence page for each meeting.

**Technical seamless vs.
seamless user experience**

effectiveness / user experience

Integrations can be frustrating

★★★★★ 2/5
Feb 4, 2022
Lacks functionality
Surprisingly basic tool which adds very little value. Neither Trello nor HubS seemed very basic and reasonable.

hard to set up

VK by Vinod Kotiya on Feb 2nd 2023
★★★★★
It does not link with time tracking of Jira. It's a different standalone system linked with Clockwork is better alternative.
Was this Review Helpful? [Yes](#)

by Marc Eshleman on Feb 25th 2019
★★★★★
Solid start, but no way to dynamically keep contacts sync. IE adding new contacts in salesforce doesn't automatically sync them with Confluence - you need to manually add each contact.

manual

RP by R. Prokop on Apr 13th 2022
★★★★★
A lot of errors. After the last import error the app hangs completely. I can only cancel it, I only can close and reopen the browser, I can not import another file. Really bad!!!
Was this Review Helpful? [Yes](#) [No](#)

not reliable

DF by Daniel Frappell on Jan 26th 2022
★★★★★
Can't get it to work.

by Kat Vukmanovic on Aug 10th 2022
★★★★★
The UI is not intuitive, and UX is bad - you have to click on "Pull" to immediately see them when I open a ticket.

slow

LS by Luz Silverio on Apr 22nd 2019
★★★★★
Giving 2 stars since it could have been a good product if to be utilized. The big setback is the 12hrs TAT (turnaround time) just to reflect the update/changes on the system. Synching of it should be of close to real time atleast - 12hrs is absurd.

not up to date

by Maik van Rossum on Feb 10th 2021
★★★★★
Simple, so it performs well on a basic integration level. It just pushes an Issue from Jira to Todist's Inbox, where it's created with a title and unique link to the issue in Jira.
But, this integration is one-directional, so Jira doesn't know the task in Todoist. Nor does completing the task in Todoist update the status in Jira (or vice versa).
Hitting the menu item in Jira once again, simply creates a duplicate task in Todoist. I can't find an option to automate this so you'll have to keep both platforms in sync manually.

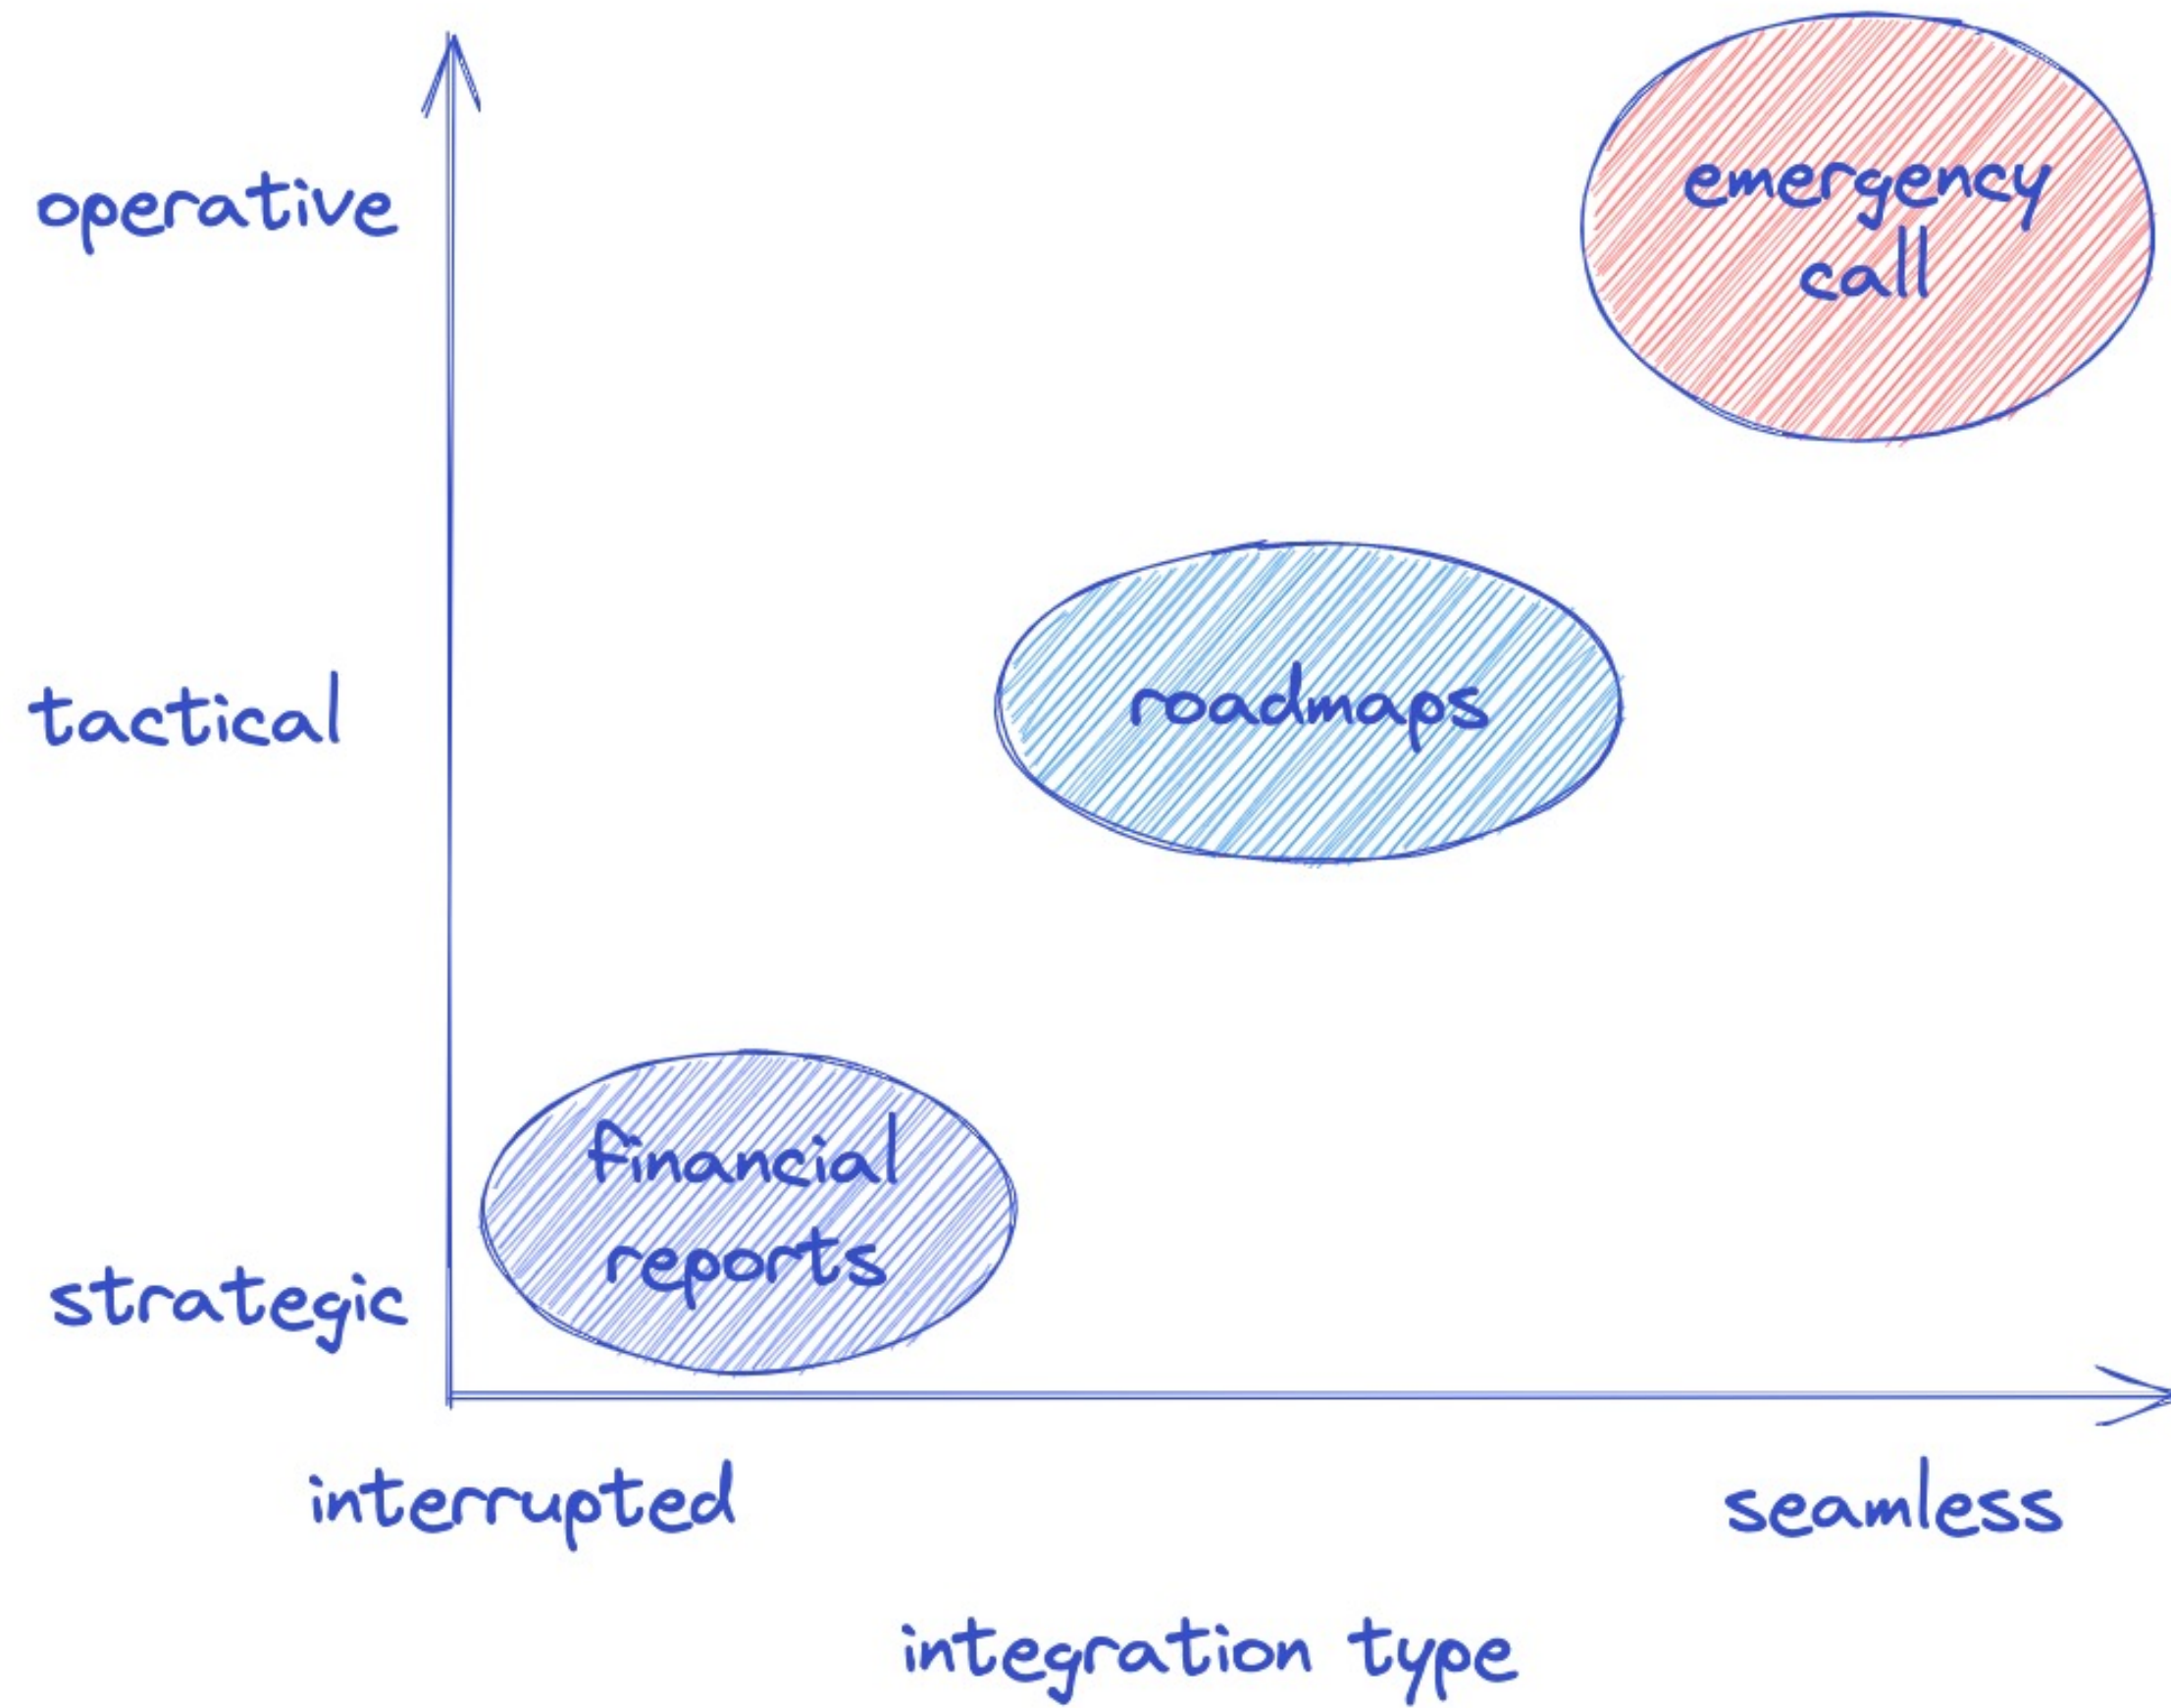

duplicates data

by Evan Nixon on Jun 3
★★★★★
This application is all right. The filters/searches for them is great. It's just really unfortunate that when the app displays it is so friggin' ugly. Rather than using the same wiki-style renderer that you see natively on the Confluence page itself (or even a ticket using the "Smart-Embed" feature) this app displays the page just....wrong. I'm not sure if it's using the "Old Editor" view or what the issue is, but the colours and formatting are just really really not nice.

bad formatting/styles

by Thibault Messemacre on Sep 6th 2021
★★★★★
Poor permission management, a lot of manual v
Very limited

features missing

Integration assessment framework

A framework to assess and rank integrations

Business value: Contributes to business goals, productivity, reducing costs, or competitive advantage

User impact: Direct or indirect benefits from the integration for employees and managers

Cost-benefit analysis: Comparing the projected or estimated costs and benefits

Seamlessness: Real-time/fast data syncing, minimal manual input, ease of use

Reliability: Should work consistently and reliably over time without causing errors or disruptions; offers good support

Data availability: Redundancy, backups, availability when source disconnected

Complexity: Manual/triggered, one-way, two-way, integration platform

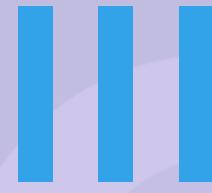

Feature richness: Does it leverage the features and customization options present in both systems?

Performance: Should not negatively impact the performance or speed of the software systems it connects, and should be optimized for maximum efficiency

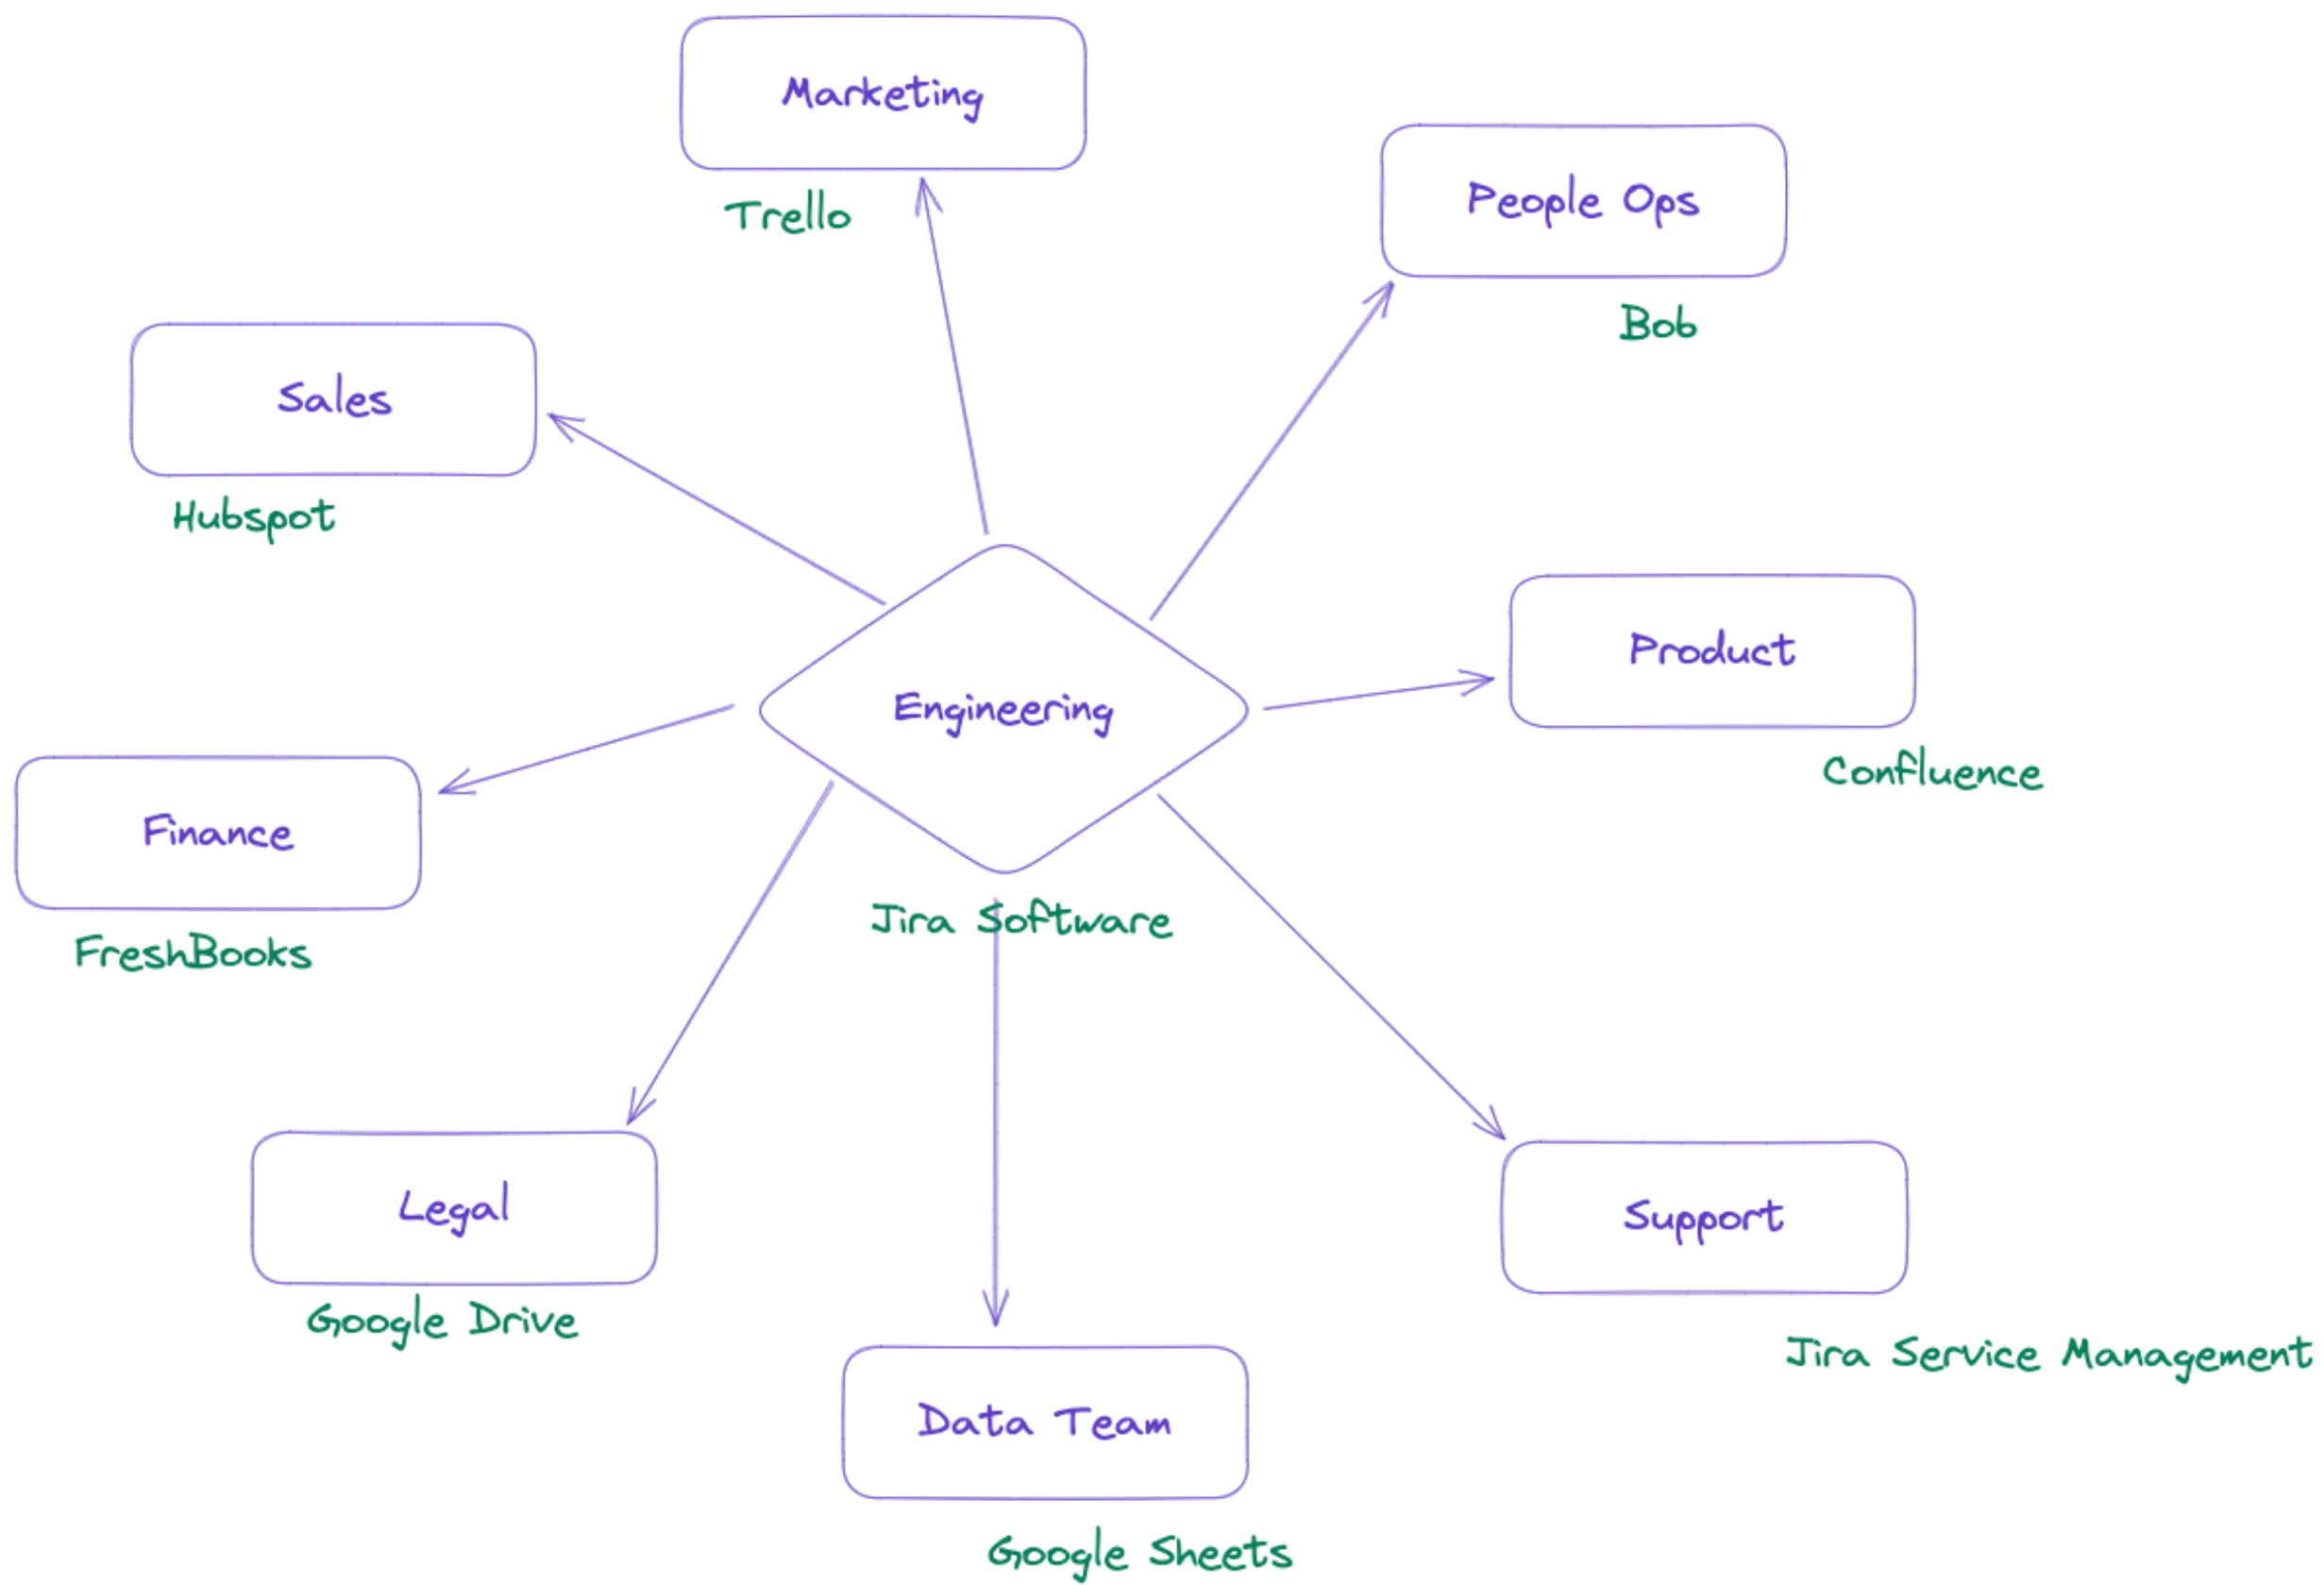

Security: Protect the integrity, confidentiality, and availability of data being integrated

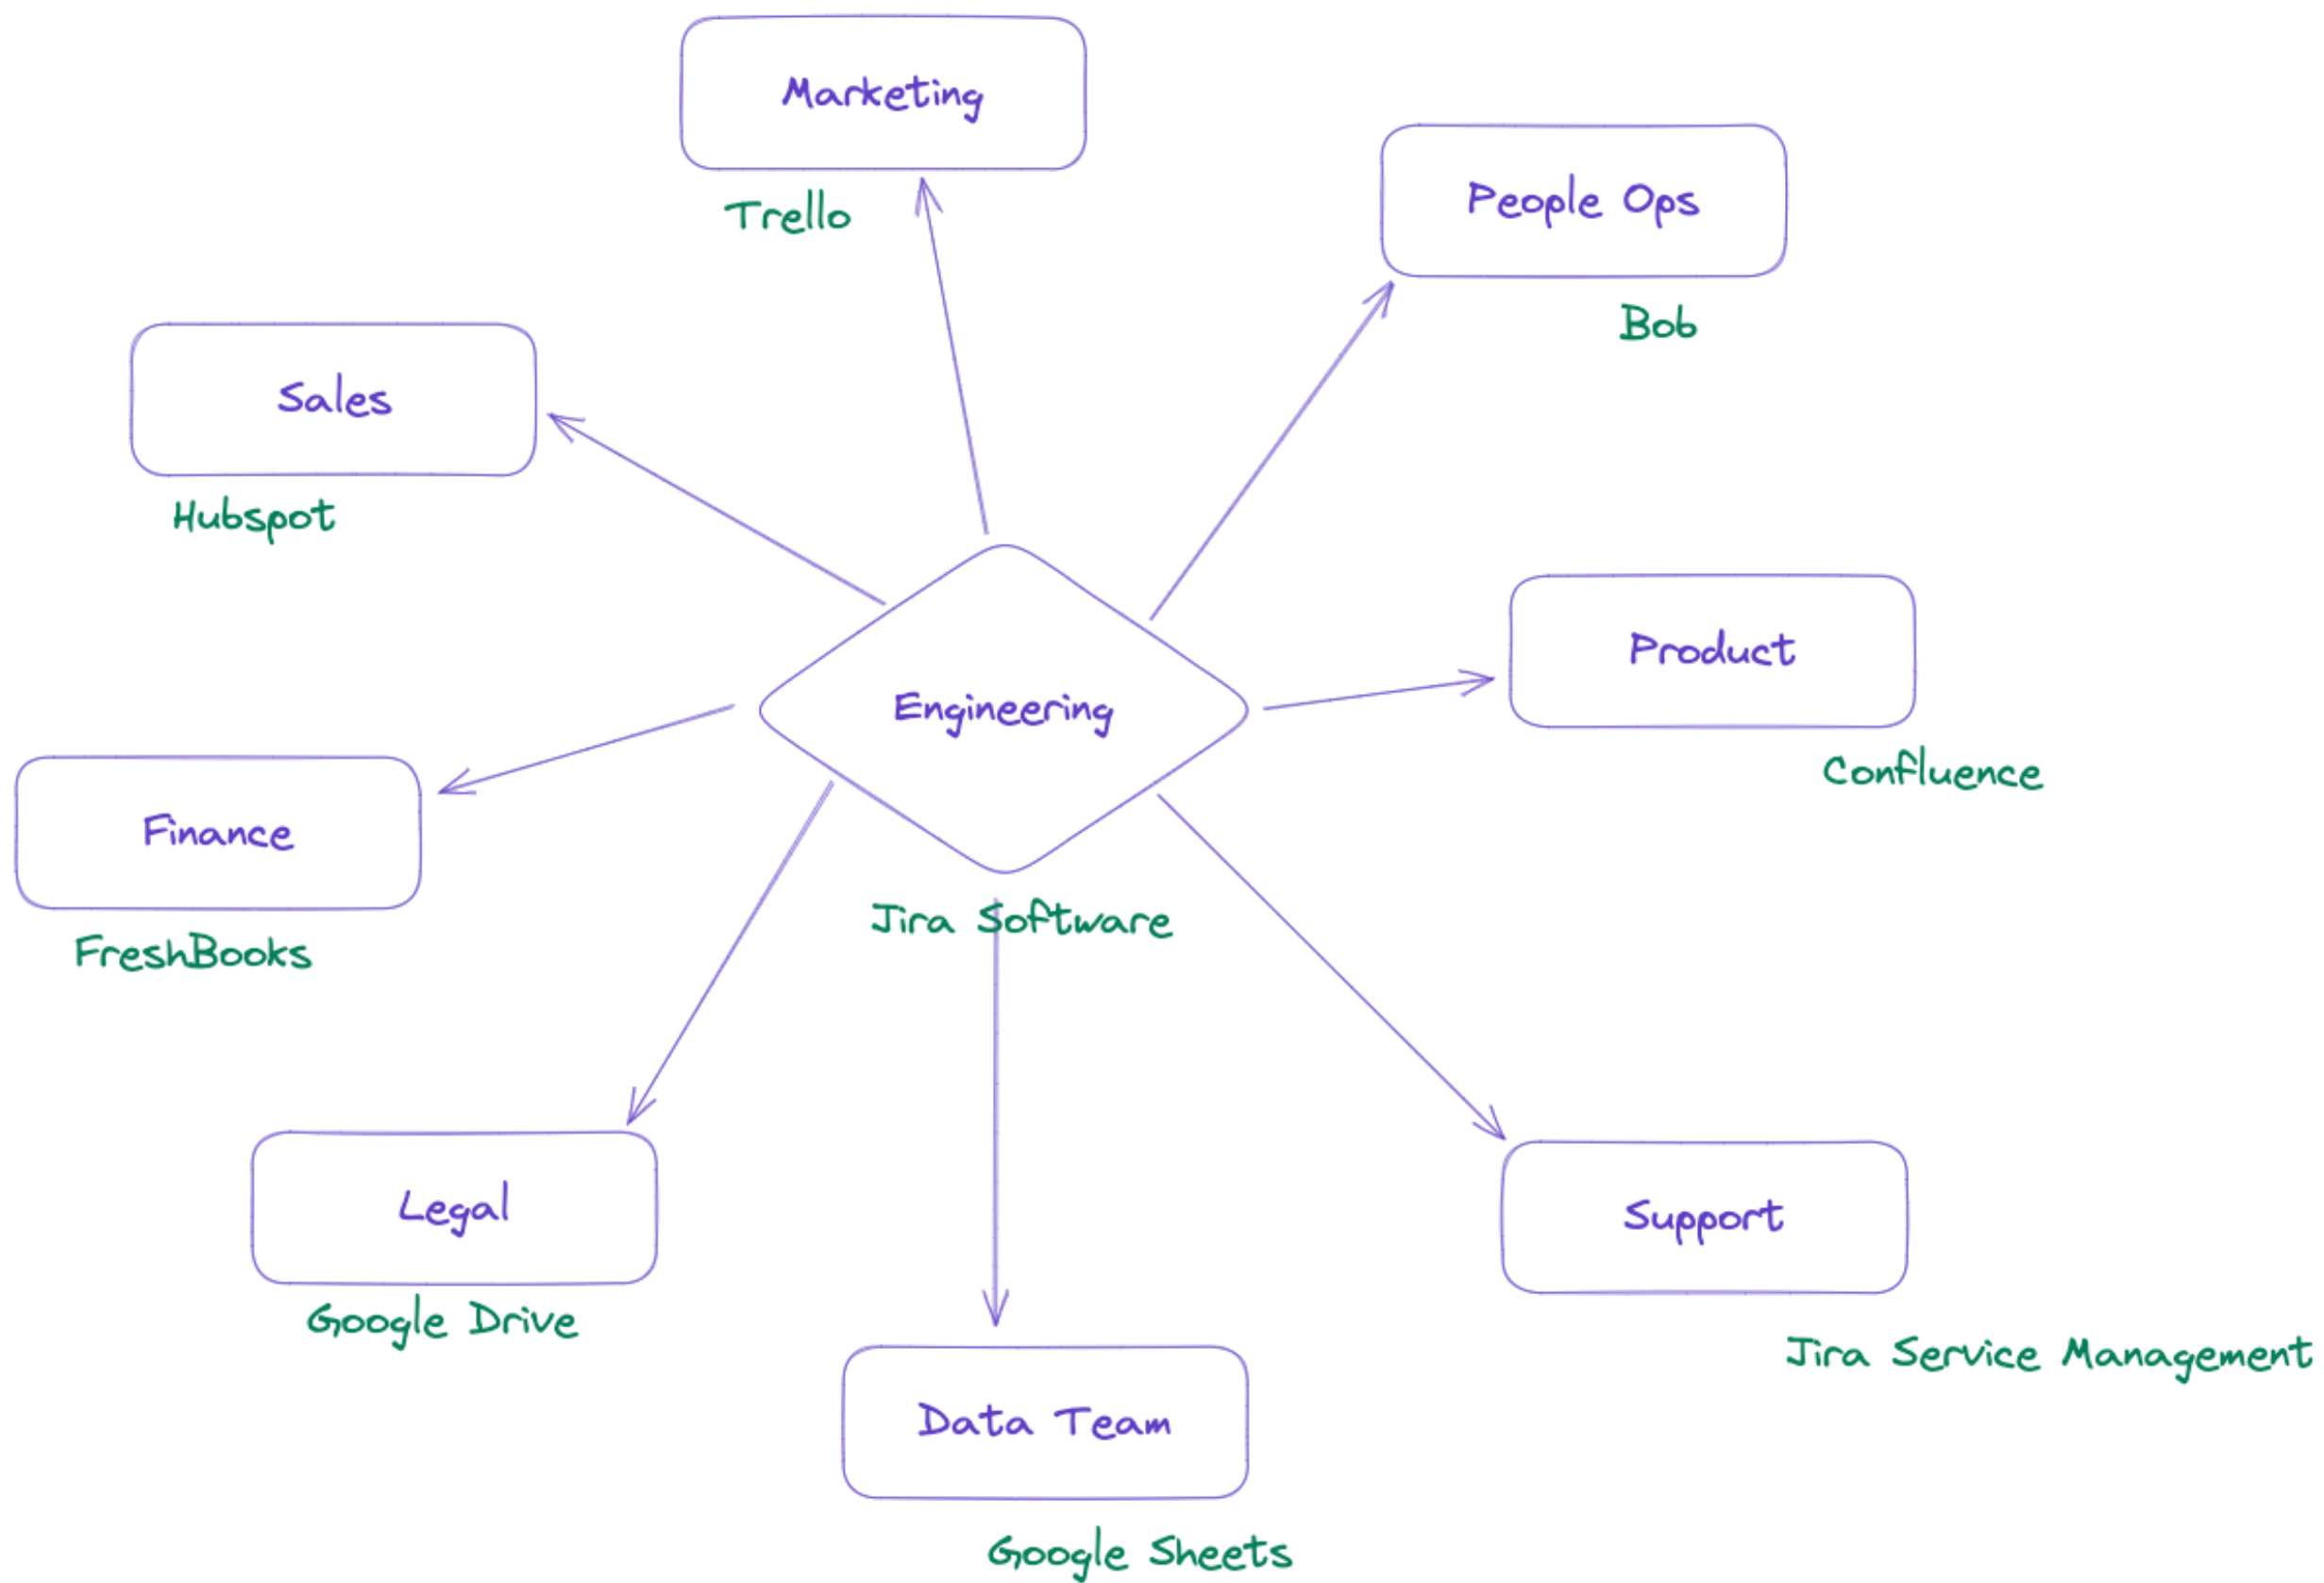

Compliance: Compliant with relevant legal and regulatory requirements and privacy

Innovation: Support new and innovative use cases and workflows, adapt to changing business needs over time

-  **Innovation:** Support new and innovative use cases and workflows, adapts to changing business needs over time

3b. Hubspot & Trello integration via Unito

Your flow will only sync new tasks or cards

Choose your flow direction

By default, Tasks and Cards will flow both ways between your tools. If you only want Tasks to get created in Hubspot or Cards to get created in Trello, you can change this flow's direction below. Whatever you choose here, you'll later be able to tune that behavior to better reflect the way you work.

Date	Activity type	Updated fields	Status
30 Mar 10:43:06 PM	Update	DueDate	Success
30 Mar 10:42:37 PM	Update	DueDate	Success
30 Mar 10:39:29 PM	Create	Column, Description, Due...	Success
30 Mar 10:34:28 PM	Create	Column, Description, Due...	Success

Assessment — Hubspot & Trello (via Unito)

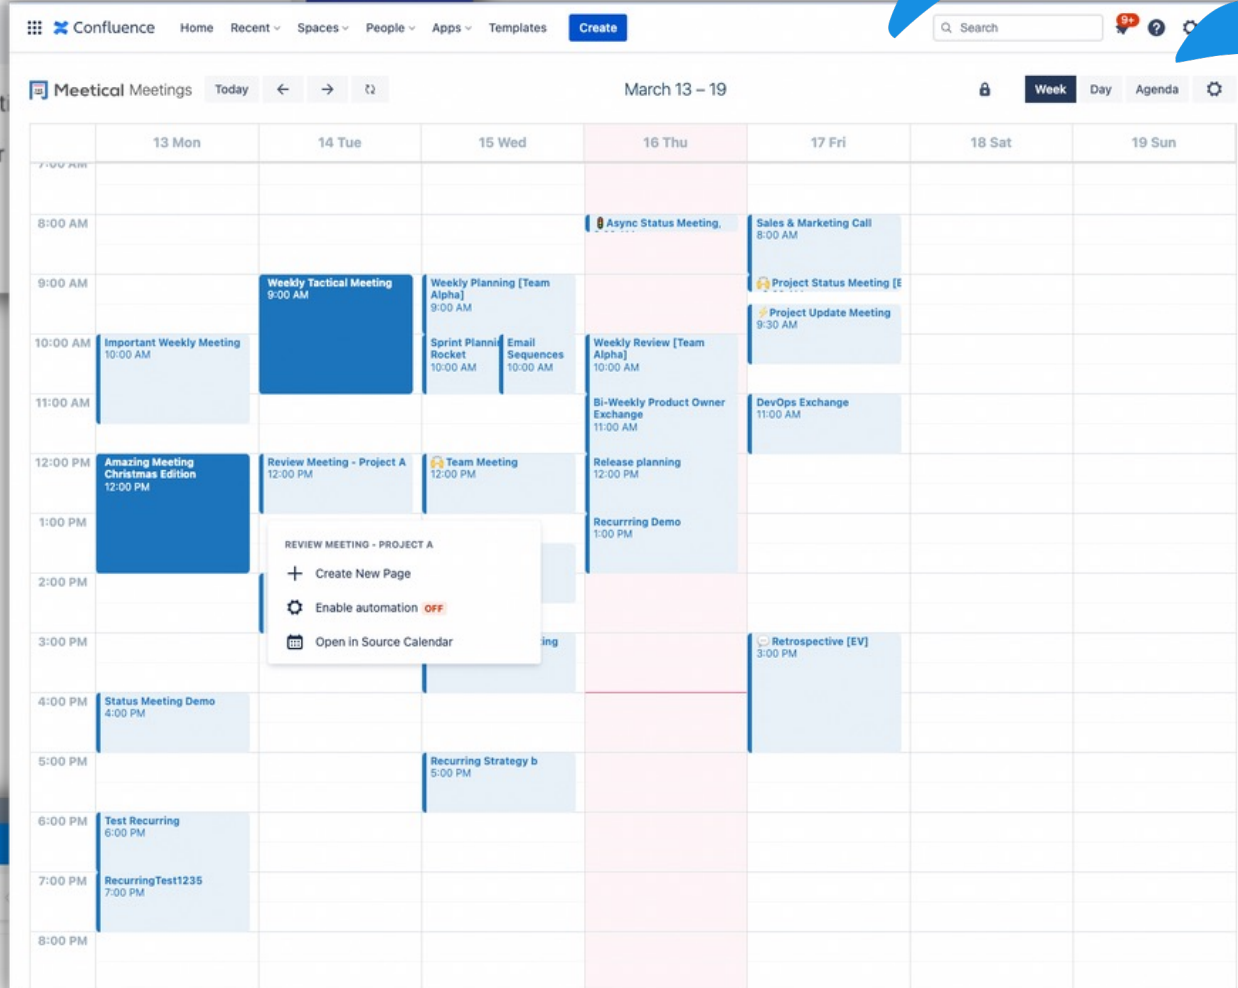

-  **Business value:** Contributes to business goals, productivity, reducing costs, or competitive advantage
-  **User impact:** Direct or indirect benefits from the integration for employees and managers
-  **Cost-benefit analysis:** Comparing the projected or estimated costs and benefits
-  **Seamlessness:** Real-time/fast data syncing, minimal manual input, ease of use
