DevEx as a service

The rise of platform engineering

SVEN PETERS | DEVOPS ADVOCATE | @SVENPET

What is a great
developer experience?

Developer experience

[dɪ'vel.ə.pəː ɪk'spɪr.i.əns]

Developer experience refers to how easy or difficult it is for a developer to perform essential tasks needed to implement a change. A positive developer experience would mean these tasks are relatively easy for the team.

Credo

New Credo [Schedule Review](#)

i Credo checks were revisited by the [SME stewards](#) for simplification, improved relevance and messaging clarity making compliance to the Credo requirements easier and fun. You might notice some checks deprecated while others have their DoD requirements streamlined. Have a query or feedback? Head to [go/credo](#) or drop us a line at [#help-credo](#)

card-authorization

Active Tier 1

Description

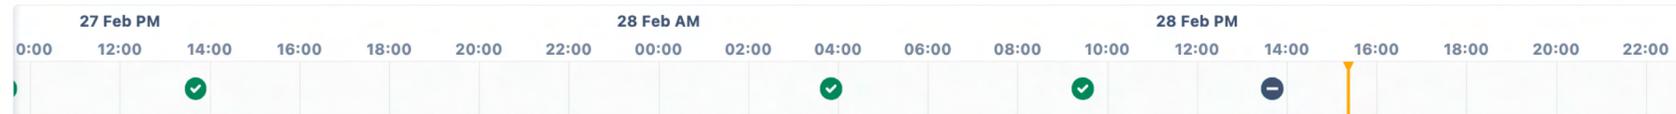

This service decides which requests are allowed access to the Identity API gateway. All documentation for id-gatekeeper is held in idproxy as id-gatekeeper is a hard dependency for idproxy. It enables idproxy to do ASAP authentication.

Create CheckOps

Set aside some time to complete this check-in as a team. Gather data beforehand such as SLOs and incident that may have occurred to reflect on these items as a team and improve over time. [Learn more about CheckOps](#)
