ATLASSIAN CLOUD EXPERTS

Migrate your Atlassian Stack to the Cloud with help from a Platinum Solution Partner and focus on your business objectives.

The majority of businesses using Atlassian applications choose to migrate their Stack to a Cloud environment for a number of reasons. Atlassian Cloud has recently made showstopping improvements to their Cloud offering with Enterprise being the latest to join Standard and Premium.

Instead of storing applications on your own servers, Atlassian can host, set up, secure and maintain them in the Cloud for you.

As an Atlassian Platinum Solution Partner, we offer secure migrations and additional support for those wanting to migrate to Atlassian Cloud.

WHY MIGRATE WITH AN ATLASSIAN PARTNER?

There's less risk involved and we can ensure no data is lost with minimal downtime or disruption.

- ▶ A fast and easy setup means you can invite team members the minute you sign up.
- ▶ Save money on physical hardware, maintenance, installation, support and other hidden admin costs.
- ▶ No upgrades required with access to the latest and greatest features.
- ▶ Work securely from any browser and/or Cloud mobile app on the go.
- ▶ Real-time security updates and rigorous practices to track and protect data.

▶ We handle the procurement of inventory and storage space so you can scale with confidence.

▶ Immediate responses to dynamic spikes in demand and team growth.

WHY MIGRATE WITH CLEARVISION?

We've migrated hundreds of instances to different Cloud environments and have found that the main reason businesses opt for a Partner to migrate their Atlassian applications instead of going to them directly is the level of risk involved.

We can help you plan and execute a migration that mitigates operational risk, reduces data loss and minimises downtime.

“

We were very satisfied with the support Clearvision provided during our instance migration. Amazing support and technical knowledge.
