Productive Time Tracking for Jira

CASE STUDY

CBG saw a 10% increase in teams' productivity due to better time reporting, cross-functional team adoption and streamlined budget tracking

! Problem

The challenges that CBG experienced were the unnecessary rising of costs and complexity from multiple, disparate IT management tools.

✓ Solution

After a regular review of CBG's IT portfolio, CBG determined a need for a more effective and efficient time, resource and cost management solution.

☺ Benefit

CBG noticed increased engagement with project teams and team leads, and a greater appreciation of teamwork and team planning. The company saw about a 10% increase in teams' productivity.

"

" CBG has noticed increased engagement with project teams and team leads, and a greater appreciation of teamwork and team planning. "

Paweł Krasuski, System Manager for CBG's JIRA implementation and Jason Seva, Team Lead for the IT Project Management team
