TEMPO TIMESHEETS

Efficient Time Tracking for Jira

CASE STUDY

Arizona State University in Tempe, AZ is a public research university ranked #1 in the U.S. for innovation

! Problem

The University Technology Office ran into cost and usability issues with its original tool.

✓ Solution

ASU assessed several tools before the University Technology Office decided to transition to Atlassian's suite of products, including Tempo.

☺ Benefit

Timesheets was easy to implement and configure. There is less effort required to record time. Managers see how much work is coming in, how much time is spent, and what the breakdown is.

" *With Tempo, we can take the effort that we spend on projects and roll them up into Accounts and look at how much effort and time is being spent on a variety of projects throughout the technology office.* "

Nathanael Davis, Director of Business Support and Quality Assurance in the IT Department
