

## Atlassian Support

As an **Atlassian Platinum Solutions Partner** with real enterprise experience, Expium offers *targeted consulting* for large and small organizations.

**Governance** for your Atlassian tools requires some education and a flexible but solid framework. Expium can get you there!

**Customized Jira Configuration** optimizes and transforms your Jira instance and Marketplace Apps to fit your unique requirements. Expium completes in one engagement what can take years within an organization.

**Business Transformations** are set in motion when strong Atlassian methodologies bring existing inefficiencies and dependencies to the surface. Transformations can be tough, and require a nuanced, experienced approach.

**Expert Services** can be a support line when you need it, for as long as you need it: tweaking workflows over time, generating reports for executives, automating processes, managing documentation, and more.

Hear from our Certified Atlassian Experts, SAFe® Program Consultants, or Certified Engineers in one of our free webinars:

**Introduction to Jira Align**  
**Enterprise Governance**  
**Agile Approach to HR**
