**Tempo creates embedded solutions that enable organizations to track, plan, manage *and understand* time, their most constrained resource.**

# More than 20,000 customers, large and small, use Tempo to gain visibility into time and its true value.

# But why do you measure time?

Organizations need a **shared understanding** of time in order to improve **productivity**, increase **efficiency** and manage the difficult tasks of **budgeting** and **planning**.

## Goals & Expectations

| | |
|---|---|
| **Measure** | **Optimize** |
| **Billable vs. Non-billable work** | **Maximize Output** |
| **Monitor** | **Plan** |
| **Resource Planning** | **Schedule** |
| **OPEX/CAPEX** | **Project Costing** |

**Tempo is the leader in time tracking and resource planning, giving organizations the insight they need to align.**

**Keep on Top of Project Costs**
Transform your team's tracked time efforts into tracked cost.

**Plan Resources**
Optimize the use of resources and plan staffing needs.

**Track Customer Costs & CAPEX**
Organize time tracking data into categories for reporting.

**Manage Project Finances**
Monitor the financials of projects and portfolios.

**And Tempo does it all seamlessly, with time management applications that are:**

Simple to deploy

Effortless to use with automation

Embedded into your current processes

Multi-platform ( Cloud, Server & Data Center) and cross-device

In your daily workflow to ensure accurate data without extra effort

# But the real power is in the meaningful reporting features.

### Accurate & Detailed Data

See time logged for issues, projects, teams, users, accounts or even custom Jira filters.

### Powerful Insights

Build custom reports in seconds, with granular data and useful insights into the value of time.

### Accessible Integrations

Integrate your tools and workflow with Tempo Rest APIs using detailed support and documentation.
